Appendix 1: Land Use Zonings

Introduction

The zonings contained within this section and illustrated on the accompanying maps are indicative of the level and nature of development which is deemed by the Planning Authority to be appropriate to the area. The zonings are intended to be flexible, provided that the basic concepts of proper planning, residential amenity and good design practice are adhered to. Any proposed development should be compatible with the primary zoning use and should not detract from the amenity of the area. These zonings should be read in conjunction with the Development Management Standards, particularly in relation to design, materials, public open space and parking requirements and the following section which relates to the land use zoning matrix.

This section should be read in conjunction with *Chapter 4: Core Strategy, Settlement and Housing Strategies*.

Land Use Zoning

The land use zoning emphasis of this plan is that of 'compact growth' and urban consolidation, which supports the re-using of 'brownfield' land, infill sites and underutilised lands in towns and villages across the settlement hierarchy. The settlement plans for each of the towns and villages aim to promote continued sustainable growth, providing for increased employment and supporting social infrastructure to deliver a higher quality of life.

The zonings aim to promote the orderly development of the County by eliminating potential conflicts between incompatible land uses and establishing an efficient basis for investment in public infrastructure and facilities. Associated zoning policy also has regard to the strategic policies underlying the Development Plan. These include the principles of climate action, sustainable development through consolidated growth, the integration of land use and transportation planning and the maintenance and improvement of the quality of life across the County as a whole.

Land Use Zoning Categories and Objectives

The following table sets out the land use categories contained within the Development Plan and associated zoning objectives:

Land Use Zoning Category	Objective
Town Core	<i>Provide for the development and enhancement of town core uses including retail, residential, commercial, civic and other uses.</i>
Residential	<i>To provide for residential development and protect and improve residential amenity.</i>
New Residential	<i>To provide for new residential development in tandem with the provision of the necessary social and physical infrastructure.</i>
Residential / Community Services / MediCentre	<i>To accommodate the existing residential and MediCentre/community services and healthcare facility which have already been established on the site and</i>

	<i>allows for the consolidation and expansion of these services.</i>
Social / Community / Education / Public Utility	<i>To primarily provide for educational, health, social, cultural, religious and community facilities.</i>
Recreation / Amenity and Green Spaces	<i>To primarily provide for recreational open space, (environmental buffers) and ancillary structures.</i>
Protected Area / Passive Amenity	<i>To protect this area from unsuitable development, while enhancing its potential to continue as a valuable recreational and educational resource for Lanesborough.</i>
Industrial / Commercial / Warehousing	<i>To primarily provide for industrial/workshop, warehouse and commercial or business development including compatible uses such as offices and distribution.</i>
Industrial / Alternative Energy	<i>To primarily provide for industrial/workshop, warehouse and commercial or business development including compatible uses such as offices and distribution and to allow for the expansion of existing energy infrastructure.</i>
Light Industrial / Commercial / Servicing	<i>To primarily provide for small scale industrial/workshop and warehouse development including compatible uses such as offices and distribution.</i>
Tourism	<i>To support the provision of a heritage and amenity centre.</i>
Tourism and Events	<i>To realise the tourism potential of the area.</i>
Canal Redevelopment Area	<i>To facilitate environmental improvement works, including the provision of enhanced pedestrian facilities, street furniture and play areas etc.</i>
Airport Development Objective	<i>To provide for Airport related activities and the expansion of existing Air Facilities to provide for appropriate employment uses directly related to such activities and operations only.</i>
Strategic Residential Reserve	<i>To provide for the longer-term housing requirements of the town.</i>
Strategic Industrial Reserve	<i>To provide for the longer term industrial/workshop, warehouse and commercial or business development including compatible uses such as offices and distribution.</i>
Constrained Land Use Objective	<i>To facilitate the appropriate management and sustainable use of flood risk areas.</i>
Reservation Objective	<i>To reserve these lands free from development that would hinder the future sustainable development of the town.</i>

Land Use Zoning Matrix

The Land Use Zoning Matrix sets out each land use zoning type in the context of future development, in terms of whether particular development would be permitted, open for consideration or not normally permitted on such zoned lands. As such it provides guidance on the various uses that are considered acceptable in principle in each of the zoning objectives.

Uses other than the primary use for which an area is zoned may be permitted provided the use is not in conflict with the zoning objective or any other policies and objectives in the Plan. Any use not listed in the permissible or open for consideration categories is deemed not to be acceptable in principle. Such uses will be considered on their individual merits and will only be permitted if they enhance, complement, are ancillary to, or neutral to the zoning objective.

The guidance provided in this section is not intended to replace the normal planning process. An indication that a proposal would be 'permissible' within a particular land use zoning objective should in no way be taken to imply a grant of permission, or indeed that a planning application may necessarily be successful. Individual applications are a matter for the Council to decide upon, taking into consideration the wider policies and objectives that pertain to statutory land use planning including Development Plan Standards, Ministerial Guidance, and the merits of individual proposals.

P - 'Permitted in Principle'

'Permitted in Principle' means that the proposed use is generally acceptable subject to the normal planning process and compliance with the relevant policies, objectives, standards and requirements as set out in the County Development Plan, in accordance with the proper planning and sustainable development of the area. If a proposal is indicated to be 'Permitted in Principle' in the zoning matrix, this does not imply that planning permission will automatically be granted as other factors must be considered and each proposal for development will be considered on its individual merits.

O - 'Open for Consideration'

The proposed use may be permitted where the local authority is satisfied that it is in compliance with the zoning objectives, standards and requirements as set out in the County Development Plan, and that the proposal would not conflict with the permitted, existing or adjoining land-uses by reason of its nature and scale, in accordance with the proper planning and sustainable development of the area.

X - 'Not Normally Permitted'

The proposed use will not normally be favourably considered by the local authority, except in exceptional circumstances, and in such instances, the development may represent a material contravention of the Plan.

Uses Not Listed in the Indicative Zoning Matrix

Proposed land-uses which are not listed in the indicative land-use zoning matrix will be considered on their merits having regard to the most appropriate use of a similar nature indicated in the matrix, the proper planning and sustainable development of the

area and compliance with the relevant policies and objectives, standards set out in both this Plan and relevant Section 28 Guidelines.

Non-Conforming Uses

'Non-conforming uses' are established uses that do not conform to the primary zoning objectives of the Plan. These include instances where such uses were in existence on 1st October 1964 (i.e. prior to planning legislation); have valid permission; are unauthorised but have exceeded the time limit for enforcement proceedings; have no permission and may or may not be the subject of enforcement proceedings. Any proposals for the expansion, improvement, or alteration of such uses will be considered on their individual merits. Development proposals that relate to the intensification of non-conforming uses, will be permitted only where the proposed development would not be detrimental to the amenities of the surrounding area and is consistent with the proper planning and sustainable development of the area.

Appendix 1A: Key Town Longford Town

Key Town: Longford Town

This relates to large economically active service and/or county towns that provide employment for their surrounding areas and with high-quality transport links and the capacity to act as growth drivers to complement the Regional Growth Centres. Longford Town is the only 'Key Town' in the County.

Longford town is the dominant settlement in the County in terms of population, economic activity, level of service and infrastructure and connectivity. Longford is correctly identified as a Key Town for economic growth and development within the Region and the County within the Eastern and Midland RSES which characterises such settlements as *'economically active towns that provide employment for their surrounding areas and the capacity to act as regional drivers to complement the Regional Growth Centres'*.

The town already boasts a high job-to-resident-workers ratio (1.596 from 2016 Census) with significant in-commuting and employment in sectors such as advanced manufacturing, pharma and agri-food. Given its strong employment base, its critical mass and its designation within the region under the RSES, Longford town will be the focus for much of the economic development and projected population growth.

The town has well-established economic, administrative and social functions along with important retail, service and amenity functions for the County and neighbouring towns. Strong emphasis will be placed on the regeneration of key areas and further development of the town in order to sustain its important role within the County. The town has good communication links including the two national roads; the N63 leaves Longford town for Roscommon and the N55 from Cavan to Athlone which takes a north-south route through the east of the County, passing through Granard, Edgeworthstown and Ballymahon. The town is served by the Dublin to Sligo train line which links up with Dublin and Mullingar in the east and Sligo and Leitrim to the north-west.

Town Core:

To provide for the development and enhancement of town core uses including retail, residential, commercial, civic and other uses.

The purpose of this zoning is to protect and enhance the special character of the town centre and to provide for and improve retailing, residential, commercial, cultural and other uses appropriate to the centre of Longford. This zoning provides for the consolidated development and growth of the town centre, allowing for a broad range of compatible and complementary uses which will be encouraged to locate in this area. Development will be expected to contribute to a dynamic, vibrant and pedestrian focused town core with a strong urban design approach. The Council will encourage the appropriate re-use, adaptation and regeneration of buildings, backlands, derelict and obsolete lands including residential development above retail and commercial premises in the town centre.

Development carried out under this zoning should have regard to the mix of uses of the zoning, and, in particular, shall have regard to the retail policy for the County. Developers should be cognisant of the high profile locations of this zoning and design, wherein siting and materials should be chosen accordingly. All development in this regard will be subject to sequential test.

It is envisioned that much of the proposed retail/commercial development in the town would take place in the existing commercial core, revitalising the centre of Longford and include provision for car parking.

Residential

To provide for residential development and protect and improve residential amenity.

This zoning is intended primarily for established housing development but may include a range of other uses particularly those that have the potential to improve the residential amenity of residential communities.

Potential sites may range from small gap infill, unused or derelict land and backland areas, side gardens of existing houses, up to larger undeveloped sites within an established residential area. A balance must be struck between the reasonable protection of the amenities and privacy of adjoining dwellings, the protection of established character and the need to provide infill development.

Proposals for development involving the intensification of residential uses within existing residential areas will need to clearly demonstrate that the proposal respects the existing character of the area and would not harm the amenity value of adjacent properties. Proposed developments within the zoned area may include other uses particularly those that have the potential to improve the residential amenity of residential communities; developments within the zoned area may include such uses including schools, crèches, small shops, doctor's surgeries, small scale residential, playing fields etc.

Within this zoning category, the improved quality of existing residential areas will be the Council's priority.

New Residential

To provide for new residential development in tandem with the provision of the necessary social and physical infrastructure.

The principles of sustainable development shall be taken into account when considering applications for new residential development in the area, including the use of appropriate housing densities, natural, locally sourced materials, energy efficiency and transport implications, the impact on the existing ecology and compatibility with local environmental conditions. It is considered appropriate that existing residential areas are augmented and areas where gaps or "leapfrogging" of development have occurred are infilled, and the town be consolidated for the purposes of an appropriate and sustainable town structure, creating a clear urban/rural divide.

Where appropriate, development design proposals shall provide for further access to adjacent zones of residential lands in order to facilitate their future access and development.

Strategic Residential Reserve

To provide for the longer-term housing requirements of the town.

Residential development, other than that set out below, will not be permitted on these lands during the lifetime of the Plan. (It should be noted that lands zoned for the purposes of strategic residential reserve may be released for development over future plan periods). The following residential type of development may be considered acceptable:

- 1) Where there is a live permission for residential development that has not been activated.
The life of these permissions may be extended in accordance with the provisions of Section 42A of the Planning & Development Act 2000, as amended. Proposals for new developments will not be considered over the lifetime of the current plan period.
- 2) A proposal for a single dwelling house may be considered under this zoning where:
 - a) the unit to be provided will serve as the permanent place of residence of the landowner or a member of his/her immediate family.
 - b) and where it can be clearly demonstrated that the provision of such a unit would not compromise the ability of the wider area of zoned land to be developed in the future.
 - c) and the dwelling would easily integrate with the existing and future development of the lands and those in the vicinity.
- 3) In exceptional circumstances, where it can be clearly demonstrated by the developer that there is a significant difficulty in the release or identification of lands for a specific residential type development, consideration will be given to the release of lands zoned Strategic Residential Reserve, subject to established planning criteria and including in particular:
 - a) The requirement to remain within the overall residential land use targets as set out in the Core Strategy.
 - b) The lands are being developed in a sequential manner.
 - c) It has been clearly justified and demonstrated, to the satisfaction of the Planning Authority, that there is a clear discrepancy between the supply and release of residentially zoned lands and the demand for residential units.

Certain developments that can demonstrate a strategic element, (e.g. a significant commercial or social element), may be deemed acceptable.

Industrial/Commercial/Warehousing

To primarily provide for industrial/workshop, warehouse and commercial or business development including compatible uses such as offices and distribution.

These are existing and proposed employment areas within the town and environs, that are central in securing sustained economic growth for the plan area. Zonings of industrial nature are indicative and are adaptable to the nature, size and requirements of future employment/industrial development. The creation of local employment is the primary aim of this zoning. Business parks including business/office and light industrial developments will be considered within this zoning. In certain instances, brownfield sites of a strategic nature may be considered for business use subject to compliance with all relevant development management standards. New developments will need to demonstrate a high standard of design and innovation in the construction of new industrial buildings and facilities and ensure that the surrounding areas are well maintained.

The dual zoning is weighed towards industrial development, with allowances made for ancillary commercial development. Larger scale commercial development under this zoning will require the preparation of a detailed plan for the area involved prior to consideration, and, in particular retail, to be considered in the light of the findings of the retail strategy. The term 'Commercial' does not include traditional commercial functions that should locate within the town core. Where appropriate, development design proposals shall provide for further access to adjacent zones of industrial lands in order to facilitate their future access and development.

Recreation, Amenity and Green Spaces

To primarily provide for recreational open space and ancillary structures.

To preserve, provide for and improve active and passive recreational public and private open space, environmental buffers and ancillary structures. The areas included in this zoning objective cover both private and public open space and are dispersed throughout urban centres of every size. The Council will not normally permit development that would result in a loss of open space and green infrastructure. This zoning provides for the planned increase in green infrastructure throughout the town including open spaces, parks and development incidental to the enjoyment of open space including sport and leisure facilities such as a clubhouse, changing rooms, meeting rooms, a gym, sports training halls, catering facilities, caretaker accommodation.

The zoning also provides for the reservation of environmental buffers at strategic corridors. The proposed utilization of the River Camlin and Royal Canal as a walk and park would provide a recreational backbone to the town which would provide a wildlife corridor and a potential link to other walking routes, facilitating the establishment of a pedestrian network of pathways. The zoning further facilitates the protection of existing green areas and public open spaces which provide for the passive and active recreational needs and provides for the use of such land or such facilities for games, educational and recreational purposes.

The importance of the preservation of the Albert Reynolds Peace Park (The Mall) and the area previously used as the Longford Dog Track for the amenity and recreational use of the town are identified. The historical significance and amenity value of the Albert Reynolds Peace Park (The Mall) is recognised and the Planning Authority shall

seek to protect, preserve and enhance the extent of this area and associated features for the continued amenity use of the public and in terms of its historical preservation. The area previously used as the Longford Dog Track in recognition of its historical and cultural significance to Longford Town shall be protected for the amenity purposes and use of the public.

Social/Community/Education/Public Utility

To primarily provide for educational, health, social, cultural, religious and community facilities.

This zoning encompasses community uses (such as schools, churches, OPDs etc.), public utility and social/administrative designations such as the Fire and Garda Stations. Expansion of these services will be facilitated where needed and compatible with adjoining land uses.

Constrained Land Use

To facilitate the appropriate management and sustainable use of flood risk areas.

This zoning objective limits new development, while recognising that existing development uses within these zones may require small scale development, as outlined below, over the life of the Plan, which would contribute towards the compact and sustainable urban development of the County's zoned settlements.

The underlying zoning or the existing permitted uses are deemed to be acceptable in principle for minor developments to existing buildings (such as small extensions to houses, most changes of use of existing buildings), which are unlikely to raise significant flooding issues, provided they do not obstruct important flow paths, introduce a significant additional number of people into flood risk areas, or entail the storage of hazardous substances.

Development proposals within this zone shall be accompanied by a detailed Flood Risk Assessment, carried out in accordance with *The Planning System and Flood Risk Assessment Guidelines* and *Circular PL 2/2014* (or as updated), which shall assess the risks of flooding associated with the proposed development.

Proposals shall only be considered where it is demonstrated to the satisfaction of the Planning Authority that they would not have adverse impacts or impede access to a watercourse, floodplain or flood protection and management facilities, or increase the risk of flooding to other locations. The nature and design of structural and non-structural flood risk management measures required for development in such areas will also be required to be demonstrated, to ensure that flood hazard and risk will not be increased. Measures proposed shall follow best practice in the management of health and safety for users and residents of the development.

Specifications for developments in flood vulnerable areas set out in this Plan shall be complied with as appropriate (Please also refer to CPO 5.120 and DMS16.206).

Appendix 1B: Self-Sustaining Town Granard

Self-Sustaining Growth Town: Granard

Self-Sustaining Growth Towns have a moderate level of jobs and services – includes sub-county market towns and commuter towns with good transport links and capacity for continued commensurate growth to become more self-sustaining. These provide an important supporting and complementary role in developing regional and county-level economic growth in tandem with the primary economic growth town of Longford Town. In County Longford there is 1 no. 'Self-Sustaining Growth Town:' Granard.

Granard

Granard is a Key Employment Centre with a regional element acting as an important driver for local economies in the area, with well-established economic, administrative and social functions. The town performs an important retail, residential, service and amenity functions for local rural hinterlands and supports the principal town of Longford. Granard has a well-established manufacturing base with particular emphasis on food and agri-feed sectors, with the Pat the Baker manufacturing site and Kiernan Milling both significant employers in the area. Granard also has a growing tourism and heritage sector, driven principally by the Granard Motte historical site where significant investment in tourism and regeneration funding has been acquired to deliver world standard heritage tourism facility.

Strong emphasis will be placed on the growth of the local economy in Granard and the development of its vital administrative and social functions to support and complement growth in the region, developing and enhancing synergistic links with the adjacent Border Region.

Town Core:

To provide for the development and enhancement of town core uses including retail, residential, commercial, civic and other uses.

The purpose of this zoning is to protect and enhance the special character of the town centre and to provide for and improve retailing, residential, commercial, cultural and other uses appropriate to the centre of Granard. This zoning provides for the consolidated development and growth of the town centre, allowing for a broad range of compatible and complementary uses which will be encouraged to locate in this area. Development will be expected to contribute to a dynamic, vibrant and pedestrian focused town core with a strong urban design approach. The Council will encourage the appropriate re-use, adaptation and regeneration of buildings, backlands, derelict and obsolete lands including residential development above retail and commercial premises in the town centre.

Development carried out under this zoning should have regard to the mix of uses of the zoning, and, in particular, shall have regard to the retail policy for the County. Developers should be cognisant of the high profile locations of this zoning and design, wherein siting and materials should be chosen accordingly.

It is the policy of the Council to ensure maximum pedestrian permeability between the Main Street, Barrack Street and ancillary areas throughout the town centre. In this regard the pedestrian use of existing archways, lanes and passages, and the development of new non-vehicular linkages between Main/Barrack Street and backland and/or infill development and parking areas will be promoted, particularly where passive overlooking, active frontages, adequate lighting and security can be reasonably achieved. Developers will be required to facilitate such access where possible as part of any development proposal.

Where appropriate, development design proposals shall provide for further access to adjacent zones of commercial/residential lands in order to facilitate future access and development.

New Residential

To provide for new residential development in tandem with the provision of the necessary social and physical infrastructure.

The principles of sustainable development shall be taken into account when considering applications for residential development in the area, including the use of appropriate housing densities, natural, locally sourced materials, energy efficiency and transport implications, the impact on the existing ecology and compatibility with local environmental conditions.

It is considered appropriate that existing residential areas are augmented and areas where gaps or 'leapfrogging' of development have occurred are infilled (most noticeable on the north western and south western approaches into the settlement), and the town be consolidated for the purposes of an appropriate and sustainable town structure, creating a clear urban/rural divide.

Requirements will be imposed in relation to the provision of interconnecting public open spaces in connection with larger residential developments, with particular emphasis on riverside access and walking routes, as outlined under the **Recreational** designation. Open space shall be designed with the following concepts in mind: safety, security, usability, access to the river, wildlife and habitat protection, character creation/preservation.

Where appropriate, development design proposals shall provide for further access to adjacent zones of residential lands in order to facilitate their future access and development.

Residential

To provide for residential development and protect and improve residential amenity.

This zoning is intended primarily for established housing development but may include a range of other uses particularly those that have the potential to improve the residential amenity of residential communities such as schools, crèches, small shops, doctor's surgeries, small scale residential, playing fields, etc.

Potential sites may range from small gap infill, unused or derelict land and backland areas, side gardens of existing houses, up to larger undeveloped sites within an established residential area. A balance must be struck between the reasonable protection of the amenities and privacy of adjoining dwellings, the protection of established character and the need to provide infill development. Proposals for development involving the intensification of residential uses within existing residential areas will need to clearly demonstrate that the proposal respects the existing character of the area and would not harm the amenity value of adjacent properties.

Within this zoning category the improved quality of existing residential areas will be the Council's priority.

Strategic Residential Reserve

To provide for the longer-term housing requirements of the town.

Residential development, other than that set out below, will not be permitted on these lands during the lifetime of the Plan (it should be noted that lands zoned for the purposes of strategic residential reserve may be released for development over future plan periods). The following residential type of development may be considered acceptable:

- 1) Where there is a live permission for residential development that has not been activated.
The life of these permissions may be extended in accordance with the provisions of Section 42A of the Planning & Development Act 2000, (as amended). Proposals for new developments will not be considered over the lifetime of the current plan period.
- 2) A proposal for a single dwelling house may be considered under this zoning where:
 - a) the unit to be provided will serve as the permanent place of residence of the landowner or a member of his/her immediate family.
 - b) and where it can be clearly demonstrated that the provision of such a unit would not compromise the ability of the wider area of zoned land to be developed in the future.
 - c) and the dwelling would easily integrate with the existing and future development of the lands and those in the vicinity.
- 3) In exceptional circumstances where it can be clearly demonstrated by the developer that there is a significant difficulty in the release or identification of lands for a specific residential type development, consideration will be given to the release of lands zoned Strategic Residential Reserve, subject to established planning criteria and including in particular:
 - a) The requirement to remain within the overall residential land use targets as set out in the Core Strategy.
 - b) The lands are being developed in a sequential manner.
 - c) It has been clearly justified and demonstrated, to the satisfaction of the Planning Authority, that there is a clear discrepancy between the supply and release of residentially zoned lands and the demand for residential units.

Certain developments that can demonstrate a strategic element, (e.g. a significant commercial or social element), may be deemed acceptable.

Industrial/Commercial/Warehousing

To primarily provide for industrial/workshop, warehouse and commercial or business development including compatible uses such as offices and distribution.

Zonings of industrial nature are indicative and are adaptable to the nature, size and requirements of future employment/industrial development. The creation of local employment opportunities is the primary aim of this zoning. Hi-tech business/office, and light industrial developments will be considered. In certain instances, brownfield sites of a strategic nature may be considered for business use including compatible uses such as offices and distribution subject to compliance with all relevant development control standards. The term 'Commercial' does not include traditional commercial functions that should locate within the town core.

Where appropriate, development design proposals shall provide for further access to adjacent zones of industrial lands in order to facilitate their future access and development.

Strategic Industrial Reserve

To provide for the longer term industrial/workshop, warehouse and commercial or business development including compatible uses such as offices and distribution

Lands zoned for the purposes of Strategic Industrial Reserve may be considered to meet longer term industrial needs of the area outside of the current Plan period. New industrial development of a substantial nature is not considered appropriate on these lands however in limited circumstances where live permissions for industrial development exists under this zoning, the life of said permission may be extended having regard to the provisions of the Planning and Development Act 2000 (as amended).

Proposals for single small-scale industrial units <500m² are considered appropriate on these lands where it can be demonstrated that such provision would not compromise the future ability of the adjoining lands to be developed as part of an overall scheme and that the development would integrate successfully with any future development. In addition, where it has been clearly justified and demonstrated, to the satisfaction of the Planning Authority, that there is a clear discrepancy between the supply and release of industrial zoned lands and the demand for specific industrial development, consideration will be given to the release of lands zoned Strategic Industrial Reserve for these purposes.

Tourism

To support the provision of a heritage and amenity centre.

This objective facilitates the provision of a heritage and amenity visitor centre in connection with the Granard Motte and visitor centre. Development of this area could include the provision of a hotel/leisure centre with conference facilities with potential for an integrated interpretative centre. In any case, development in this area must be of the highest quality with due regard given to the sensitivity of the location. This will include a high-quality finish with carefully designed form, scale, design and materials to blend in with the surrounding landscape. Layout and location of parking and ancillary facilities will be an important element in the design of any proposed development in this location.

Location of water sports and other active recreational facilities will be considered in this area, subject to stringent design criteria due to the sensitivity of the location.

Reservation Objective

To reserve these lands free from development that would hinder the future sustainable development of the town.

A strategic corridor will be reserved. Future development within this corridor (such as a relief road to bypass the town along the N55) would need to be provided for and subject to a Plan-level SFRA.

Social/Community/Education/Public Utility

To primarily provide for educational, health, social, cultural, religious and community facilities.

This zoning provides for facilities that serve the community as a whole such as schools, community centres, creches, nursing homes etc.

Recreation/Amenity and Green Spaces

To primarily provide for recreational open space, environmental buffers and ancillary structures.

To preserve, provide for and improve active and passive recreational public and private open space, environmental buffers and ancillary structures. The areas included in this zoning objective cover both private and public open space and are dispersed throughout urban centres of every size. The Council will not normally permit development that would result in a loss of open space. This zoning provides for open spaces, parks and development incidental to the enjoyment of open space including sport and leisure facilities such as a clubhouse, changing rooms, meeting rooms, a gym, sports training halls, catering facilities, caretaker accommodation.

The zoning also provides for the reservation of environmental buffers at strategic corridors and further facilitates the protection of existing green areas and public open spaces which provide for the passive and active recreational needs and provides for

the use of such land or such facilities for games, educational and recreational purposes.

Developments in flood vulnerable areas as set out below shall be complied with as appropriate.

Constrained Land Use

To facilitate the appropriate management and sustainable use of flood risk areas.

This zoning objective limits new development, while recognising that existing development uses within these zones may require small scale development, as outlined below, over the life of the Plan, which would contribute towards the compact and sustainable urban development of the County's zoned settlements.

The underlying zoning or the existing permitted uses are deemed to be acceptable in principle for minor developments to existing buildings (such as small extensions to houses, most changes of use of existing buildings), which are unlikely to raise significant flooding issues, provided they do not obstruct important flow paths, introduce a significant additional number of people into flood risk areas or entail the storage of hazardous substances.

Development proposals within this zone shall be accompanied by a detailed Flood Risk Assessment, carried out in accordance with *The Planning System and Flood Risk Assessment Guidelines* and *Circular PL 2/2014* (or as updated), which shall assess the risks of flooding associated with the proposed development.

Proposals shall only be considered where it is demonstrated to the satisfaction of the Planning Authority that they would not have adverse impacts or impede access to a watercourse, floodplain or flood protection and management facilities, or increase the risk of flooding to other locations. The nature and design of structural and non-structural flood risk management measures required for development in such areas will also be required to be demonstrated, to ensure that flood hazard and risk will not be increased. Measures proposed shall follow best practice in the management of health and safety for users and residents of the development.

Specifications for developments in flood vulnerable areas set out in this Plan shall be complied with as appropriate (please also refer to CPO 5.120 and DMS16.206).

Appendix 1C: Self-Sustaining Towns Ballymahon Edgeworthstown Lanesborough

Self-Sustaining Towns – Ballymahon, Edgeworthstown and Lanesborough

'Self-Sustaining Towns' relate to high levels of population growth and a weak employment base which are reliant on other areas for employment and/or services and which require targeted 'catch up' investment to become more self-sustaining. There are 3 no. 'Self-Sustaining Towns' in County Longford; Ballymahon, Edgeworthstown and Lanesborough.

Ballymahon

Ballymahon is located on the River Inny to the east of Lough Ree and is situated almost centrally between the large settlements of Athlone to the south-west, Mullingar to the east and Longford to the north. The town is served by an adequate road network-the national secondary route (N55) from Athlone to Cavan passes through the town as well as the regional route (R392) from Lanesborough to Mullingar, which generates steady levels of traffic through the settlement. Ballymahon exhibits a typical market town structure, based around a strong linear north-west/south-east axis. The main commercial activity is contained within a central core.

Ballymahon has a strong manufacturing and light-industrial base, with a key retail and service-sector standing within the county, with significant growth in tourism-orientated services such as food and drink, hostelryes, tourist accommodation. The growth in this sector, and related service sector employment, can be directly related to the establishment of the nearby Longford Forest Center Parcs resort in July 2019, which itself is a considerable employer with approximately 1,000 jobs.

Town Core:

To provide for the development and enhancement of town core uses including retail, residential, commercial, civic and other uses.

The purpose of this zoning is to protect and enhance the special character of the town centre and to provide for and improve retailing, residential, commercial, cultural and other uses appropriate to the centre of Ballymahon. This zoning provides for the consolidated development and growth of the town centre, allowing for a broad range of compatible and complementary uses which will be encouraged to locate in this area. Development will be expected to contribute to a dynamic, vibrant and pedestrian focused town core with a strong urban design approach. The Council will encourage the appropriate re-use, adaptation and regeneration of buildings, backlands, derelict and obsolete lands including residential development above retail and commercial premises in the town centre.

Development carried out under this zoning should have regard to the mix of uses of the zoning, and, in particular, shall have regard to the retail policy for the County. Developers should be cognisant of the high profile locations of this zoning and design, wherein siting and materials should be chosen accordingly. All development in this regard will be subject to sequential test.

It is envisioned that much of the proposed retail/commercial development in the town would take place in the existing commercial core, revitalising the centre of Ballymahon and include provision for car parking.

New Residential

To provide for new residential development in tandem with the provision of the necessary social and physical infrastructure.

The principles of sustainable development shall be taken into account when considering applications for residential development in the area, including the use of appropriate housing densities, natural, locally sourced materials, energy efficiency and transport implications, the impact on the existing ecology and compatibility with local environmental conditions.

It is considered appropriate that existing residential areas are augmented and areas where gaps or “leapfrogging” of development have occurred are infilled (most noticeable on the north western and south western approaches into the settlement), and the town be consolidated for the purposes of an appropriate and sustainable town structure, creating a clear urban/rural divide.

Requirements will be imposed in relation to the provision of interconnecting public open spaces in connection with larger residential developments, with particular emphasis on riverside access and walking routes, as outlined under the **Recreational** designation.

Open space shall be designed with the following concepts in mind: safety, security, usability, access to the river, wildlife and habitat protection, character creation/preservation.

Where appropriate, development design proposals shall provide for further access to adjacent zones of residential lands in order to facilitate their future access and development.

Residential

To provide for residential development and protect and improve residential amenity.

This zoning is intended primarily for established housing development but may include a range of other uses particularly those that have the potential to improve the residential amenity of residential communities such as schools, crèches, small shops, doctor’s surgeries, small scale residential, playing fields, etc.

Potential sites may range from small gap infill, unused or derelict land and backland areas, side gardens of existing houses, up to larger undeveloped sites within an established residential area. A balance must be struck between the reasonable protection of the amenities and privacy of adjoining dwellings, the protection of established character and the need to provide infill development. Proposals for

development involving the intensification of residential uses within existing residential areas will need to clearly demonstrate that the proposal respects the existing character of the area and would not harm the amenity value of adjacent properties. Within this zoning category the improved quality of existing residential areas will be the Council's priority.

Residential/Community Services/Medi-centre

This zoning relates to the area of the former "workhouse" site to the south of the town on the western bank of the River Inny. The zoning accommodates the existing residential and medi-centre/community services and healthcare facility which have already been established on the site and allows for the consolidation and expansion of these services.

Any development at this location shall be designed to the highest standard and shall take cognisance of the riverside location and the preservation of recreational and visual amenity in this context.

Strategic Residential Reserve

To provide for the longer-term housing requirements of the town.

Residential development, other than that set out below, will not be permitted on these lands during the lifetime of the Plan (It should be noted that lands zoned for the purposes of strategic residential reserve may be released for development over future plan periods). The following residential type of development may be considered acceptable:

- 1) Where there is a live permission for residential development that has not been activated.
The life of these permissions may be extended in accordance with the provisions of Section 42A of the Planning & Development Act 2000, (as amended). Proposals for new developments will not be considered over the lifetime of the current plan period.
- 2) A proposal for a single dwelling house may be considered under this zoning where:
 - a) the unit to be provided will serve as the permanent place of residence of the landowner or a member of his/her immediate family.
 - b) and where it can be clearly demonstrated that the provision of such a unit would not compromise the ability of the wider area of zoned land to be developed in the future.
 - c) and the dwelling would easily integrate with the existing and future development of the lands and those in the vicinity.
- 3) In exceptional circumstances where it can be clearly demonstrated by the developer that there is a significant difficulty in the release or identification of lands for a specific residential type development, consideration will be given to the release of lands zoned Strategic Residential Reserve, subject to established planning criteria and including in particular:
 - a) The requirement to remain within the overall residential land use targets as set out in the Core Strategy.

- b) The lands are being developed in a sequential manner.
- c) It has been clearly justified and demonstrated, to the satisfaction of the Planning Authority, that there is a clear discrepancy between the supply and release of residentially zoned lands and the demand for residential units.

Certain developments that can demonstrate a strategic element, (e.g. a significant commercial or social element), may be deemed acceptable.

Social/Community/Education/Public Utility

To primarily provide for educational, health, social, cultural, religious and community facilities.

This zoning encompasses community uses (such as schools, churches, OPDs etc.), public utility and social/administrative designations such as the Fire and Garda Stations. Expansion of these services will be facilitated where needed and compatible with adjoining land uses.

Industrial/Commercial/Warehousing

To primarily provide for industrial/workshop, warehouse and commercial or business development including compatible uses such as offices and distribution.

These are existing and proposed employment areas within the town and environs, that are central in securing sustained economic growth for the plan area. Zonings of industrial nature are indicative and are adaptable to the nature, size and requirements of future employment/industrial development. The creation of local employment is the primary aim of this zoning. The creation of local employment opportunities is the primary aim of this zoning. Business parks including business/office and light industrial developments will be considered within this zoning. In certain instances, brownfield sites of a strategic nature may be considered for business use subject to compliance with all relevant development management standards. New developments will need to demonstrate a high standard of design and innovation in the construction of new industrial buildings and facilities and ensure that the surrounding areas are well maintained

The dual zoning is weighed towards industrial development, with allowances made for ancillary commercial development. Larger scale commercial development under this zoning will require the preparation of a detailed plan for the area involved prior to consideration, and, in particular retail, to be considered in the light of the findings of the retail strategy. The term 'Commercial' does not include traditional commercial functions that should locate within the town core. Where appropriate, development design proposals shall provide for further access to adjacent zones of industrial lands in order to facilitate their future access and development.

Recreation/Amenity and Green Spaces

To primarily provide for recreational open space, environmental buffers and ancillary structures.

To preserve, provide for and improve active and passive recreational public and private open space, environmental buffers and ancillary structures. The areas included in this zoning objective cover both private and public open space and are dispersed throughout urban centres of every size. The Council will not normally permit development that would result in a loss of open space. This zoning provides for open spaces, parks and development incidental to the enjoyment of open space including sport and leisure facilities such as a clubhouse, changing rooms, meeting rooms, a gym, sports training halls, catering facilities, caretaker accommodation.

The zoning also provides for the reservation of environmental buffers at strategic corridors and further facilitates the protection of existing green areas and public open spaces which provide for the passive and active recreational needs and provides for the use of such land or such facilities for games, educational and recreational purposes. The proposed utilisation of the River Inny as a riverside walk and park would provide a recreational backbone to the town which would provide a wildlife corridor through the town and a potential link to other outlying recreational areas such as Newcastle woods, providing a community base for walking, watersports and other outdoor pursuits.

Developments in flood vulnerable areas as set out below shall be complied with as appropriate.

Constrained Land Use

To facilitate the appropriate management and sustainable use of flood risk areas.

This zoning objective limits new development, while recognising that existing development uses within these zones may require small scale development, as outlined below, over the life of the Plan, which would contribute towards the compact and sustainable urban development of the County's zoned settlements.

The underlying zoning or the existing permitted uses are deemed to be acceptable in principle for minor developments to existing buildings (such as small extensions to houses, most changes of use of existing buildings), which are unlikely to raise significant flooding issues, provided they do not obstruct important flow paths, introduce a significant additional number of people into flood risk areas or entail the storage of hazardous substances.

Development proposals within this zone shall be accompanied by a detailed Flood Risk Assessment, carried out in accordance with *The Planning System and Flood Risk Assessment Guidelines* and *Circular PL 2/2014* (or as updated), which shall assess the risks of flooding associated with the proposed development.

Proposals shall only be considered where it is demonstrated to the satisfaction of the Planning Authority that they would not have adverse impacts or impede access to a watercourse, floodplain or flood protection and management facilities, or increase the risk of flooding to other locations. The nature and design of structural and non-structural flood risk management measures required for development in such areas

will also be required to be demonstrated, to ensure that flood hazard and risk will not be increased. Measures proposed shall follow best practice in the management of health and safety for users and residents of the development.

Specifications for developments in flood vulnerable areas set out in this Plan shall be complied with as appropriate (Please also refer to CPO 5.120 and DMS16.206).

Notes:
Please note that every effort has been made to include the latest version of Ordnance Survey mapping available. Queries on the accuracy of boundaries may be discussed and addressed at pre-planning stage with the Planning Authority.

Edgeworthstown

Edgeworthstown is identified as an important secondary economic growth town within the County. The Town has a long-established manufacturing and light-industrial base with a particular focus on agri-food and the service sector. It also has a key strategic location with excellent transport links owing to its proximity to key transport corridors in the form of the N4 and the Sligo-Dublin InterCity rail line. Emphasis will be placed on maintaining and enhancing Edgeworthstown's role as a Secondary Economic Growth Town, by way of orderly sustainable expansion commensurate with its position in the urban hierarchy.

Town Core:

To provide for the development and enhancement of town core uses including retail, residential, commercial, civic and other uses.

The purpose of this zoning is to protect and enhance the special character of the town centre and to provide for and improve retailing, residential, commercial, cultural and other uses appropriate to the centre of Edgeworthstown. This zoning provides for the consolidated development and growth of the town centre, allowing for a broad range of compatible and complementary uses which will be encouraged to locate in this area. Development will be expected to contribute to a dynamic, vibrant and pedestrian focused town core with a strong urban design approach. The Council will encourage the appropriate re-use, adaptation and regeneration of buildings, backlands, derelict and obsolete lands including residential development above retail and commercial premises in the town centre.

Development carried out under this zoning should have regard to the mix of uses of the zoning, and, in particular, shall have regard to the retail policy for the County. Developers should be cognisant of the high profile locations of this zoning and design, wherein siting and materials should be chosen accordingly. All development in this regard shall be subject to sequential test.

Residential

To provide for residential development and protect and improve residential amenity.

This zoning is intended primarily for established housing development but may include a range of other uses particularly those that have the potential to improve the residential amenity of residential communities.

Potential sites may range from small gap infill, unused or derelict land and backland areas, side gardens of existing houses, up to larger undeveloped sites within an established residential area. A balance must be struck between the reasonable protection of the amenities and privacy of adjoining dwellings, the protection of established character and the need to provide infill development. Proposals for development involving the intensification of residential uses within existing residential areas will need to clearly demonstrate that the proposal respects the existing character of the area and would not harm the amenity value of adjacent properties.

Proposed developments within the zoned area may include other uses particularly those that have the potential to improve the residential amenity of residential communities; developments within the zoned area may include such uses including schools, crèches, small shops, doctor's surgeries, small scale residential, playing fields etc. Within this zoning category the improved quality of existing residential areas will be the Council's priority.

New Residential

To provide for new residential development in tandem with the provision of the necessary social and physical infrastructure.

The principles of sustainable development shall be taken into account when considering applications for new residential development in the area, including the use of appropriate housing densities, natural, locally sourced materials, energy efficiency and transport implications, the impact on the existing ecology and compatibility with local environmental conditions.

The spatial structure of the development shall also consider characteristics of the existing built fabric. Accordingly, consideration shall be given to principle features such as Edgeworthstown House and its setting. Mostrim Rectory and the existing buildings located along the town's main street, ensuring the creation of a unique and appropriate environment that does not undermine the local sense of place.

It is considered appropriate that existing residential areas are augmented and areas where gaps or "leapfrogging" of development have occurred are infilled, and the town be consolidated for the purposes of an appropriate and sustainable town structure, creating a clear urban/rural divide.

Where appropriate, development design proposals shall provide for further access to adjacent zones of residential lands in order to facilitate their future access and development.

Strategic Residential Reserve

To provide for the longer-term housing requirements of the town

Residential development, other than that set out below, will not be permitted on these lands during the lifetime of the Plan (It should be noted that lands zoned for the purposes of strategic residential reserve may be released for development over future plan periods). The following residential type development may be considered acceptable:

- 1) Where there is a live permission for residential development that has not been activated.
The life of these permissions may be extended in accordance with the provisions of Section 42A of the Planning & Development Act 2000, (as amended). Proposals for new developments will not be considered over the lifetime of the current plan period.

- 2) A proposal for a single dwelling house may be considered under this zoning where:
 - a) the unit to be provided will serve as the permanent place of residence of the landowner or a member of his/her immediate family.
 - b) and where it can be clearly demonstrated that the provision of such a unit would not compromise the ability of the wider area of zoned land to be developed in the future.
 - c) and the dwelling would easily integrate with the existing and future development of the lands and those in the vicinity.
- 3) In exceptional circumstances where it can be clearly demonstrated by the developer that there is a significant difficulty in the release or identification of lands for a specific residential type development, consideration will be given to the release of lands zoned Strategic Residential Reserve, subject to established planning criteria and including in particular:
 - a) The requirement to remain within the overall residential land use targets as set out in the Core Strategy.
 - b) The lands are being developed in a sequential manner.
 - c) It has been clearly justified and demonstrated, to the satisfaction of the Planning Authority, that there is a clear discrepancy between the supply and release of residentially zoned lands and the demand for residential units.

Certain developments that can demonstrate a strategic element, (e.g. a significant commercial or social element), may be deemed acceptable.

Recreation, Amenity and Green Spaces

To primarily provide for recreational open space and ancillary structures.

To preserve, provide for and improve active and passive recreational public and private open space, environmental buffers and ancillary structures. The areas included in this zoning objective cover both private and public open space and are dispersed throughout urban centres of every size. The Council will not normally permit development that would result in a loss of open space.

This zoning provides for open spaces, parks and development incidental to the enjoyment of open space including sport and leisure facilities such as a clubhouse, changing rooms, meeting rooms, a gym, sports training halls, catering facilities, caretaker accommodation.

The zoning also provides for the reservation of environmental buffers at strategic corridors and further facilitates the protection of existing green areas and public open spaces which provide for the passive and active recreational needs and provides for the use of such land or such facilities for games, educational and recreational purposes.

The protection of the Black River through the inclusion of a Buffer Zone will slow and filter any run-off into the watercourse, maintain an important wildlife corridor and enhance aesthetics of the area.

Social/Community/Public Utility

To primarily provide for educational, health, social, cultural, religious and community facilities.

This zoning encompasses community uses (such as schools, churches, OPDs etc.), public utility and social/administrative designations such as the Fire and Garda Stations. Expansion of these services will be facilitated where needed and compatible with adjoining land uses.

Industrial/Commercial/Warehousing

To primarily provide for industrial/workshop, warehouse and commercial or business development including compatible uses such as offices and distribution.

Zonings of industrial nature are indicative and are adaptable to the nature, size and requirements of future employment/industrial development. The creation of local employment opportunities is the primary aim of this zoning. Hi- tech business/office, and light industrial developments will be considered within this zoning.

In certain instances, brownfield sites of a strategic nature may be considered for business use including compatible uses such as offices and distribution subject to compliance with all relevant development control standards. The term 'Commercial' does not include traditional commercial functions that should be located within the town core.

Where appropriate, development design proposals shall provide for further access to adjacent zones of industrial lands in order to facilitate their future access and development.

Strategic Industrial Reserve

To provide for the longer term industrial/workshop, warehouse and commercial or business development including compatible uses such as offices and distribution

Lands zoned for the purposes of Strategic Industrial Reserve may be considered to meet longer term industrial needs of the area outside of the current Plan period. New industrial development of a substantial nature is not considered appropriate on these lands however in limited circumstances where live permissions for industrial development exist under this zoning, the life of said permission may be extended having regard to the provisions of the Planning and Development Act 2000 (as amended).

Proposals for single small-scale industrial units <500m² are considered appropriate on these lands where it can be demonstrated that such provision would not compromise the future ability of the adjoining lands to be developed as part of an overall scheme and that the development would integrate successfully with any future development. In addition, where it has been clearly justified and demonstrated, to the satisfaction of the Planning Authority, that there is a clear discrepancy between the supply and

release of industrial zoned lands and the demand for specific industrial development, consideration will be given to the release of lands zoned Strategic Industrial Reserve for these purposes.

Constrained Land Use

To facilitate the appropriate management and sustainable use of flood risk areas.

This zoning objective limits new development, while recognising that existing development uses within these zones may require small scale development, as outlined below, over the life of the Plan, which would contribute towards the compact and sustainable urban development of the County's zoned settlements.

The underlying zoning or the existing permitted uses are deemed to be acceptable in principle for minor developments to existing buildings (such as small extensions to houses, most changes of use of existing buildings), which are unlikely to raise significant flooding issues, provided they do not obstruct important flow paths, introduce a significant additional number of people into flood risk areas or entail the storage of hazardous substances.

Development proposals within this zone shall be accompanied by a detailed Flood Risk Assessment, carried out in accordance with *The Planning System and Flood Risk Assessment Guidelines* and *Circular PL 2/2014* (or as updated), which shall assess the risks of flooding associated with the proposed development.

Proposals shall only be considered where it is demonstrated to the satisfaction of the Planning Authority that they would not have adverse impacts or impede access to a watercourse, floodplain or flood protection and management facilities, or increase the risk of flooding to other locations. The nature and design of structural and non-structural flood risk management measures required for development in such areas will also be required to be demonstrated, to ensure that flood hazard and risk will not be increased. Measures proposed shall follow best practice in the management of health and safety for users and residents of the development.

Specifications for developments in flood vulnerable areas set out in this Plan shall be complied with as appropriate (Please also refer to CPO 5.120 and DMS16.206).

Lanesborough

The main street of Lanesborough is located along the N63 (National Secondary Route) from Longford to Roscommon with the regional route from Lanesborough to Mullingar (R392) passing through in an east-west direction. The core area of the town, an important bridging point on the Shannon, is laid out in a linear pattern, running in an east-west direction across the River Shannon.

Lanesborough is currently in a state of structural economic change with the closure of the Lough Ree power station having a direct impact on ESB employees and indirectly on Bord na Móna employees with peat harvesting being the main source of fuel for the plant. Notwithstanding, the roll out of the Just Transition Fund for affected communities and workers will have significant positive impacts on a variety of sectors, ranging from agri-food to tourism to alternative energy sectors. Funding has also been secured for the development of a new community enterprise food hub which will create up to 90 jobs. Lanesborough also has a strong retail and service sectors catering for its immediate population as well as its wider hinterland.

Town Core

To provide for the development and enhancement of town core uses including retail, residential, commercial, civic and other uses.

The purpose of this zoning is to protect and enhance the special character of the town centre and to provide for and improve retailing, residential, commercial, cultural and other uses appropriate to the centre of Lanesborough. This zoning provides for the consolidated development and growth of the town centre, allowing for a broad range of compatible and complementary uses which will be encouraged to locate in this area. Development will be expected to contribute to a dynamic, vibrant and pedestrian focused town core with a strong urban design approach. The Council will encourage the appropriate re-use, adaptation and regeneration of buildings, backlands, derelict and obsolete lands including residential development above retail and commercial premises in the town centre.

Development carried out under this zoning should have regard to the mix of uses of the zoning, and, in particular, shall have regard to the retail policy for the County. Developers should be cognisant of the high profile locations of this zoning and design, wherein siting and materials should be chosen accordingly, all development in this regard will be subject to sequential test.

It is envisioned that much of the retail/commercial development in the town would take place in the existing commercial core, revitalising the centre of Lanesborough and include provision for car parking.

New Residential

To provide for new residential development in tandem with the provision of the necessary social and physical infrastructure.

The principles of sustainable development shall be taken into account when considering applications for residential development in the area, including the use of appropriate housing densities, natural, locally sourced materials, energy efficiency and transport implications, the impact on the existing ecology and compatibility with local environmental conditions.

It is considered appropriate that existing residential areas are augmented and areas where gaps or “leapfrogging” of development have occurred are infilled (most noticeable on the north western and south western approaches into the settlement), and the town be consolidated for the purposes of an appropriate and sustainable town structure, creating a clear urban/rural divide.

Requirements will be imposed in relation to the provision of interconnecting public open spaces in connection with larger residential developments, with particular emphasis on riverside access and walking routes, as outlined under the **Recreational** designation. Open space shall be designed with the following concepts in mind: safety, security, usability, access to the river, wildlife and habitat protection, character creation/preservation.

Where appropriate, development design proposals shall provide for further access to adjacent zones of residential lands in order to facilitate their future access and development.

Residential

To provide for residential development and protect and improve residential amenity.

This zoning is intended primarily for established housing development but may include a range of other uses particularly those that have the potential to improve the residential amenity of residential communities such as schools, crèches, small shops, doctor’s surgeries, small scale residential, playing fields, etc.

Potential sites may range from small gap infill, unused or derelict land and backland areas, side gardens of existing houses, up to larger undeveloped sites within an established residential area. A balance must be struck between the reasonable protection of the amenities and privacy of adjoining dwellings, the protection of established character and the need to provide infill development.

Proposals for development involving the intensification of residential uses within existing residential areas will need to clearly demonstrate that the proposal respects the existing character of the area and would not harm the amenity value of adjacent properties.

Within this zoning category the improved quality of existing residential areas will be the Council’s priority.

Strategic Residential Reserve

To provide for the longer-term housing requirements of the town

Residential development, other than that set out below, will not be permitted on these lands during the lifetime of the Plan (It should be noted that lands zoned for the purposes of strategic residential reserve may be released for development over future plan periods). The following residential type of development may be considered acceptable:

- 1) Where there is a live permission for residential development that has not been activated.
The life of these permissions may be extended in accordance with the provisions of Section 42A of the Planning & Development Act 2000, (as amended). Proposals for new developments will not be considered over the lifetime of the current plan period.
- 2) A proposal for a single dwelling house may be considered under this zoning where:
 - a) the unit to be provided will serve as the permanent place of residence of the landowner or a member of his/her immediate family.
 - b) and where it can be clearly demonstrated that the provision of such a unit would not compromise the ability of the wider area of zoned land to be developed in the future.
 - c) and the dwelling would easily integrate with the existing and future development of the lands and those in the vicinity.
- 3) In exceptional circumstances where it can be clearly demonstrated by the developer that there is a significant difficulty in the release or identification of lands for a specific residential type development, consideration will be given to the release of lands zoned Strategic Residential Reserve, subject to established planning criteria and including in particular:
 - a) The requirement to remain within the overall residential land use targets as set out in the Core Strategy.
 - b) The lands are being developed in a sequential manner.
 - c) It has been clearly justified and demonstrated, to the satisfaction of the Planning Authority, that there is a clear discrepancy between the supply and release of residentially zoned lands and the demand for residential units.

Certain developments that can demonstrate a strategic element, (e.g. a significant commercial or social element), may be deemed acceptable.

Social/Community/Education/Public Utility

To primarily provide for educational, health, social, cultural, religious and community facilities.

This zoning encompasses community uses (such as schools, churches etc.) public utility and social / administrative designations such as the Fire and Garda Stations. Expansion of these services will be facilitated where needed and compatible with adjoining land uses.

Recreation/Amenity and Green Spaces

To primarily provide for recreational open space, environmental buffers and ancillary structures.

To preserve, provide for and improve active and passive recreational public and private open space, environmental buffers and ancillary structures. The areas included in this zoning objective cover both private and public open space and are dispersed throughout urban centres of every size. The Council will not normally permit development that would result in a loss of open space.

This zoning provides for open spaces, parks and development incidental to the enjoyment of open space including sport and leisure facilities such as a clubhouse, changing rooms, meeting rooms, a gym, sports training halls, catering facilities, caretaker accommodation.

The zoning also provides for the reservation of environmental buffers at strategic corridors and further facilitates the protection of existing green areas and public open spaces which provide for the passive and active recreational needs and provides for the use of such land or such facilities for games, educational and recreational purposes.

The Green housing area is an integral part of the identity of Lanesborough, having been built by Bord na Mona in the 1950's. The Church opposite, which is a listed building, and the elevated nature of the site add to the prominence of the grassed area, making it a natural congregation and gathering area. The addition of identifying features in this area, such as bog oak sculptures and seating, would provide the basis for development of a functional congregation area in the town. The existing mature trees and planting would mean that the works required to improve this area would be minimal.

The Riverside area along the banks of the Shannon is extensively used at present by locals and non-locals alike for passive and active recreational purposes. The connections from the riverside with the Commons North area adjacent make it a popular walking route, while the presence of the internationally renowned "hot-water stretch" make a highly regarded angling location. Local organisations have recently succeeded in installing fishing stands for disabled anglers, a well needed addition to the amenity potential of the banks.

Development to the rear of the Main Street will be encouraged in a manner that enhances the riverside location, including the installation of native riverside planting to replace existing non-native hedging in particular.

Industrial/Commercial/Warehousing

To primarily provide for industrial/workshop, warehouse and commercial or business development including compatible uses such as offices and distribution.

Zonings of industrial nature are indicative and are adaptable to the nature, size and requirements of future employment/industrial development. The creation of local

employment is the primary aim of this zoning. The creation of local employment opportunities is the primary aim of this zoning. Hi-tech business parks and light industrial developments will be considered within this zoning.

In certain instances, brownfield sites of a strategic nature may be considered for business use subject to compliance with all relevant development management standards.

New developments will need to demonstrate a high standard of design and innovation in the construction of new industrial buildings and facilities and ensure that the surrounding areas are well maintained.

The zoning is weighted towards industrial development, with allowances made for ancillary commercial development. Larger scale commercial development under this zoning will require the preparation of a detailed plan for the area involved prior to consideration, and, in particular retail, to be considered in the light of the findings of the retail strategy.

The term 'Commercial' does not include traditional commercial functions that should locate within the town core. Where appropriate, development design proposals shall provide for further access to adjacent zones of industrial lands in order to facilitate their future access and development.

Industrial/Alternative Energy

To primarily provide for industrial/workshop, warehouse and commercial or business development including compatible uses such as offices and distribution and to allow for the expansion of existing energy infrastructure.

Zonings of industrial nature are indicative and are adaptable to the nature, size and requirements of future employment/industrial development. The creation of local employment opportunities is the primary aim of this zoning. Office, and light industrial developments will be considered within this zoning. In certain instances, brownfield sites of a strategic nature may be considered for business use subject to compliance with all relevant development control standards.

To facilitate the transition from peat burning to renewable energy sources, the zoning also provides for the expansion of green and alternative energy production facilities including biomass/biofuels, solar, wind and geothermal sourced energies. Manufacturing, servicing and research and development linked activities will also be considered.

Where appropriate, development design proposals shall provide for further access to adjacent zones of industrial/alternative energy lands in order to facilitate their future access and development.

Protected Area/Passive Amenity

This area forms part of the NHA/SAC/SPA of the Lough Ree area. The aim of this zoning will be to protect this area from unsuitable development, while enhancing its potential to continue as a valuable recreational and educational resource for Lanesborough.

This may involve the repair and maintenance of signage throughout the area, management and enhancement of the ecological attributes of the area and maintenance of these activities in a way that does not compromise environmental or ecological integrity.

Signage is an important element that will help to raise awareness of the importance of the area over a wide range of disciplines from geology to ecology and ornithology. This should be designed in keeping with its surroundings. Similarly, footways should be simple and cause minimal intrusion into the landscape.

Tourism

To support the provision of a heritage and amenity centre.

This objective facilitates the provision of a heritage and amenity visitor centre/national park in combination with a potential monastic trail.

The car park and Lancashire Field are predominantly located adjacent to the river with strong potential for the development of high profile leisure and amenity facilities with a possible element of interpretation and environmental education.

Development of this area could include the provision of a hotel/leisure centre with conference facilities with potential for an integrated interpretative centre. In any case, development in this area must be of the highest quality with due regard given to the sensitivity of the location. This will include a high quality finish with carefully designed form, scale, design and materials to blend in with the surrounding landscape. Layout and location of parking and ancillary facilities will be an important element in the design of any proposed development in this location.

High design standards will be required for the proposed leisure and amenity development, respecting the high profile and scenic location. This will include siting criteria that will minimise the intrusion of the new structure into the existing lakeshore setting and the sensitive use of design and materials to successfully incorporate the structure and its ancillary facilities into the surrounding landscape.

The amphitheatre development objective is located within the Lough Ree SAC, close to the Lough Ree SPA and within Flood Zone B. Any application for an amphitheatre at this location would have to be subject to a site-specific FRA and will be subject to compliance with the provisions of the Habitats and Birds Directives and subject to completion of a site-specific flood risk assessment.

Constrained Land Use

To facilitate the appropriate management and sustainable use of flood risk areas.

This zoning objective limits new development, while recognising that existing development uses within these zones may require small scale development, as outlined below, over the life of the Plan, which would contribute towards the compact and sustainable urban development of the County's zoned settlements.

The underlying zoning or the existing permitted uses are deemed to be acceptable in principle for minor developments to existing buildings (such as small extensions to houses, most changes of use of existing buildings), which are unlikely to raise significant flooding issues, provided they do not obstruct important flow paths, introduce a significant additional number of people into flood risk areas or entail the storage of hazardous substances.

Development proposals within this zone shall be accompanied by a detailed Flood Risk Assessment, carried out in accordance with *The Planning System and Flood Risk Assessment Guidelines* and *Circular PL 2/2014* (or as updated), which shall assess the risks of flooding associated with the proposed development.

Proposals shall only be considered where it is demonstrated to the satisfaction of the Planning Authority that they would not have adverse impacts or impede access to a watercourse, floodplain or flood protection and management facilities, or increase the risk of flooding to other locations. The nature and design of structural and non-structural flood risk management measures required for development in such areas will also be required to be demonstrated, to ensure that flood hazard and risk will not be increased. Measures proposed shall follow best practice in the management of health and safety for users and residents of the development.

Specifications for developments in flood vulnerable areas set out in this Plan shall be complied with as appropriate (Please also refer to CPO 5.120 and DMS16.206).

Appendix 1D: Towns and Villages Aughnaccliffe, Ballinalee, Drumlish, Keenagh, Legan and Newtownforbes

Towns and Villages: Aughnaccliffe, Ballinalee, Drumlish, Keenagh, Legan and Newtownforbes

This relates to towns and villages with local service and employment functions. This relates to 4 no. settlements in County Longford; Aughnaccliffe, Ballinalee, Drumlish, Keenagh, Legan and Newtownforbes.

Aughnaccliffe

Aughnaccliffe is a settlement in North County Longford, midway between Cavan Town and Longford Town in proximity to the lakes of the Upper Erne system and Gowna.

Town Core:

To provide for the development and enhancement of town core uses including retail, residential, commercial, civic and other uses.

The purpose of this zoning is to protect and enhance the special character of the town centre and to provide for and improve retailing, residential, commercial, cultural and other uses appropriate to the centre of Aughnaccliffe. This zoning provides for the consolidated development and growth of the town centre, allowing for a broad range of compatible and complementary uses which will be encouraged to locate in this area. Development will be expected to contribute to a dynamic, vibrant and pedestrian focused town core with a strong urban design approach. The Council will encourage the appropriate re-use, adaptation and regeneration of buildings, backlands, derelict and obsolete lands including residential development above retail and commercial premises in the town centre.

Development carried out under this zoning should have regard to the mix of uses of the zoning, and, in particular, shall have regard to the retail policy for the County. Developers should be cognisant of the high profile locations of this zoning and design, wherein siting and materials should be chosen accordingly to ensure that any additional developments enhance the existing attractive streetscape.

New Residential

To provide for new residential development in tandem with the provision of the necessary social and physical infrastructure.

The principles of sustainable development shall be taken into account when considering applications for residential development in the area, including the use of appropriate housing densities, natural, locally sourced materials, energy efficiency and transport implications, the impact on the existing ecology and compatibility with local environmental conditions.

Residential

To provide for residential development and protect and improve residential amenity.

This zoning is intended primarily for established housing development but may include a range of other uses particularly those that have the potential to improve the residential amenity of residential communities such as schools, crèches, small shops, doctor's surgeries, small scale residential, playing fields, etc.

Potential sites may range from small gap infill, unused or derelict land and backland areas, side gardens of existing houses, up to larger undeveloped sites within an established residential area. A balance must be struck between the reasonable protection of the amenities and privacy of adjoining dwellings, the protection of established character and the need to provide infill development. Proposals for development involving the intensification of residential uses within existing residential areas will need to clearly demonstrate that the proposal respects the existing character of the area and would not harm the amenity value of adjacent properties.

Within this zoning category the improved quality of existing residential areas will be the Council's priority.

Strategic Residential Reserve

To provide for the longer-term housing requirements of the town.

Residential development, other than that set out below, will not be permitted on these lands during the lifetime of the Plan (It should be noted that lands zoned for the purposes of strategic residential reserve may be released for development over future plan periods). The following residential type of development may be considered acceptable:

- 1) Where there is a live permission for residential development that has not been activated.
The life of these permissions may be extended in accordance with the provisions of Section 42A of the Planning & Development Act 2000, (as amended). Proposals for new developments will not be considered over the lifetime of the current plan period.
- 2) A proposal for a single dwelling house may be considered under this zoning where:
 - a) the unit to be provided will serve as the permanent place of residence of the landowner or a member of his/her immediate family.
 - b) and where it can be clearly demonstrated that the provision of such a unit would not compromise the ability of the wider area of zoned land to be developed in the future.
 - c) and the dwelling would easily integrate with the existing and future development of the lands and those in the vicinity.
- 3) In exceptional circumstances where it can be clearly demonstrated by the developer that there is a significant difficulty in the release or identification of lands for a specific residential type development, consideration will be given to the release of lands zoned Strategic Residential Reserve, subject to established planning criteria and including in particular;
 - a) The requirement to remain within the overall residential land use targets as set out in the Core Strategy.
 - b) The lands are being developed in a sequential manner.

c) It has been clearly justified and demonstrated, to the satisfaction of the Planning Authority, that there is a clear discrepancy between the supply and release of residentially zoned lands and the demand for residential units.

Certain developments that can demonstrate a strategic element, (e.g. a significant commercial or social element), may be deemed acceptable.

Industrial/Commercial/Warehousing

To primarily provide for industrial/workshop, warehouse and commercial or business development including compatible uses such as offices and distribution.

These are existing and proposed employment areas within the town and environs, that are central in securing sustained economic growth for the plan area. Zonings of industrial nature are indicative and are adaptable to the nature, size and requirements of future employment/industrial development. The creation of local employment is the primary aim of this zoning.

The creation of local employment opportunities is the primary aim of this zoning. Business parks including business/office and light industrial developments will be considered within this zoning. In certain instances, brownfield sites of a strategic nature may be considered for business use subject to compliance with all relevant development management standards. New developments will need to demonstrate a high standard of design and innovation in the construction of new industrial buildings and facilities and ensure that the surrounding areas are well maintained

The dual zoning is weighed towards industrial development, with allowances made for ancillary commercial development. Larger scale commercial development under this zoning will require the preparation of a detailed plan for the area involved prior to consideration, and, in particular retail, to be considered in the light of the findings of the retail strategy. The term 'Commercial' does not include traditional commercial functions that should locate within the town core. Where appropriate, development design proposals shall provide for further access to adjacent zones of industrial lands in order to facilitate their future access and development.

Recreation/Amenity and Green Spaces

To primarily provide for recreational open space, environmental buffers and ancillary structures.

To preserve, provide for and improve active and passive recreational public and private open space, environmental buffers and ancillary structures. The areas included in this zoning objective cover both private and public open space and are dispersed throughout urban centres of every size.

The Council will not normally permit development that would result in a loss of open space.

This zoning provides for open spaces, parks and development incidental to the enjoyment of open space including sport and leisure facilities such as a clubhouse, changing rooms, meeting rooms, a gym, sports training halls, catering facilities, caretaker accommodation.

The zoning also provides for the reservation of an environmental buffer in order to provide a visual barrier between different land uses and ensure the protection of the town's natural assets, maintaining an important wildlife corridor and enhancing the aesthetics of the area. The zoning further facilitates the protection of existing green areas and public open spaces which provide for the passive and active recreational needs and provides for the use of such land or such facilities for games, educational and recreational purposes.

Social/Community/Education/Public Utility

To primarily provide for educational, health, social, cultural, religious and community facilities.

This zoning provides for facilities that serve the community as a whole such as schools, community centres, creches, nursing homes, churches burial grounds etc.

Constrained Land Use

To facilitate the appropriate management and sustainable use of flood risk areas.

This objective limits new development, while recognising that existing development uses within these zones may require small scale development, as outlined below, over the life of the Plan, which would contribute towards the compact and sustainable urban development of the County's zoned settlements.

The underlying zoning or the existing permitted uses are deemed to be acceptable in principle for minor developments to existing buildings (such as small extensions to houses, most changes of use of existing buildings), which are unlikely to raise significant flooding issues, provided they do not obstruct important flow paths, introduce a significant additional number of people into flood risk areas or entail the storage of hazardous substances.

Development proposals within this zone shall be accompanied by a detailed Flood Risk Assessment, carried out in accordance with *The Planning System and Flood Risk Assessment Guidelines* and *Circular PL 2/2014* (or as updated), which shall assess the risks of flooding associated with the proposed development.

Proposals shall only be considered where it is demonstrated to the satisfaction of the Planning Authority that they would not have adverse impacts or impede access to a watercourse, floodplain or flood protection and management facilities, or increase the risk of flooding to other locations. The nature and design of structural and non-structural flood risk management measures required for development in such areas will also be required to be demonstrated, to ensure that flood hazard and risk will not

be increased. Measures proposed shall follow best practice in the management of health and safety for users and residents of the development.

Specifications for developments in flood vulnerable areas set out in this Plan shall be complied with as appropriate (Please also refer to CPO 5.120 and DMS16.206).

Notes:
Please note that every effort has been made to include the latest version of Ordnance Survey mapping available. Queries on the accuracy of boundaries may be discussed and addressed at pre-planning stage with the Planning Authority.

Ballinalee

Ballinalee has developed around a central crossroads, with a strong and focused structure within the centre of the settlement that tapers off towards the settlement edge. Ballinalee takes its name from Beal atha na Laogh, meaning “the mouth of the ford of the calves,” and is situated on the River Camlin.

Town Core:

To provide for the development and enhancement of town core uses including retail, residential, commercial, civic and other uses.

The purpose of this zoning is to protect and enhance the special character of the town centre and to provide for and improve retailing, residential, commercial, cultural and other uses appropriate to the centre of Ballinalee. This zoning provides for the consolidated development and growth of the town centre, allowing for a broad range of compatible and complementary uses which will be encouraged to locate in this area. Development will be expected to contribute to a dynamic, vibrant and pedestrian focused town core with a strong urban design approach. The Council will encourage the appropriate re-use, adaptation and regeneration of buildings, backlands, derelict and obsolete lands including residential development above retail and commercial premises in the town centre.

Development carried out under this zoning should have regard to the mix of uses of the zoning, and, in particular, shall have regard to the retail policy for the County. Developers should be cognisant of the high profile locations of this zoning and design, wherein siting and materials should be chosen accordingly to ensure that any additional developments enhance the existing attractive streetscape.

New Residential

To provide for new residential development in tandem with the provision of the necessary social and physical infrastructure.

The principles of sustainable development shall be taken into account when considering applications for residential development in the area, including the use of appropriate housing densities, natural, locally sourced materials, energy efficiency and transport implications, the impact on the existing ecology and compatibility with local environmental conditions.

Residential

To provide for residential development and protect and improve residential amenity.

This zoning is intended primarily for established housing development but may include a range of other uses particularly those that have the potential to improve the residential amenity of residential communities such as schools, crèches, small shops, doctor’s surgeries, small scale residential, playing fields, etc.

Potential sites may range from small gap infill, unused or derelict land and backland areas, side gardens of existing houses, up to larger undeveloped sites within an established residential area. A balance must be struck between the reasonable protection of the amenities and privacy of adjoining dwellings, the protection of established character and the need to provide infill development. Proposals for development involving the intensification of residential uses within existing residential areas will need to clearly demonstrate that the proposal respects the existing character of the area and would not harm the amenity value of adjacent properties.

Within this zoning category the improved quality of existing residential areas will be the Council's priority.

Strategic Residential Reserve

To provide for the longer-term housing requirements of the town.

Residential development, other than that set out below, will not be permitted on these lands during the lifetime of the Plan (It should be noted that lands zoned for the purposes of strategic residential reserve may be released for development over future plan periods). The following residential type of development may be considered acceptable:

- 1) Where there is a live permission for residential development that has not been activated.
The life of these permissions may be extended in accordance with the provisions of Section 42A of the Planning & Development Act 2000, (as amended). Proposals for new developments will not be considered over the lifetime of the current plan period.
- 2) A proposal for a single dwelling house may be considered under this zoning where:
 - a) the unit to be provided will serve as the permanent place of residence of the landowner or a member of his/her immediate family.
 - b) and where it can be clearly demonstrated that the provision of such a unit would not compromise the ability of the wider area of zoned land to be developed in the future.
 - c) and the dwelling would easily integrate with the existing and future development of the lands and those in the vicinity.
- 3) In exceptional circumstances where it can be clearly demonstrated by the developer that there is a significant difficulty in the release or identification of lands for a specific residential type development, consideration will be given to the release of lands zoned Strategic Residential Reserve, subject to established planning criteria and including in particular:
 - a) The requirement to remain within the overall residential land use targets as set out in the Core Strategy.
 - b) The lands are being developed in a sequential manner.
 - c) It has been clearly justified and demonstrated, to the satisfaction of the Planning Authority, that there is a clear discrepancy between the supply and release of residentially zoned lands and the demand for residential units.

Certain developments that can demonstrate a strategic element, (e.g. a significant commercial or social element), may be deemed acceptable.

Light Industrial/Commercial/Servicing

To primarily provide for small scale industrial/workshop and warehouse development including compatible uses such as offices and distribution.

This zoning provides for small scaled light industrial/commercial warehousing facilities and ancillary business uses.

Recreation/Amenity and Green Spaces

To primarily provide for recreational open space, environmental buffers and ancillary structures.

To preserve, provide for and improve active and passive recreational public and private open space, environmental buffers and ancillary structures. The areas included in this zoning objective cover both private and public open space and are dispersed throughout urban centres of every size. The Council will not normally permit development that would result in a loss of open space.

This zoning provides for open spaces, parks and development incidental to the enjoyment of open space including sport and leisure facilities such as a clubhouse, changing rooms, meeting rooms, a gym, sports training halls, catering facilities, caretaker accommodation.

The zoning also provides for the reservation of environmental buffers at strategic corridors throughout the town in order to provide a visual barrier between land uses and ensure the protection of the town's watercourse, maintaining an important wildlife corridor and enhancing the aesthetics of the area.

The zoning further facilitates the protection of existing green areas and public open spaces which provide for the passive and active recreational needs and provides for the use of such land or such facilities for games, educational and recreational purposes.

Social/Community/Education/Public Utility

To primarily provide for educational, health, social, cultural, religious and community facilities.

This zoning provides for facilities that serve the community as a whole such as schools, community centres, nursing homes etc.

Constrained Land Use

To facilitate the appropriate management and sustainable use of flood risk areas.

This objective limits new development, while recognising that existing development uses within these zones may require small scale development, as outlined below, over the life of the Plan, which would contribute towards the compact and sustainable urban development of the County's zoned settlements.

The underlying zoning or the existing permitted uses are deemed to be acceptable in principle for minor developments to existing buildings (such as small extensions to houses, most changes of use of existing buildings), which are unlikely to raise significant flooding issues, provided they do not obstruct important flow paths, introduce a significant additional number of people into flood risk areas or entail the storage of hazardous substances.

Development proposals within this zone shall be accompanied by a detailed Flood Risk Assessment, carried out in accordance with *The Planning System and Flood Risk Assessment Guidelines* and *Circular PL 2/2014* (or as updated), which shall assess the risks of flooding associated with the proposed development.

Proposals shall only be considered where it is demonstrated to the satisfaction of the Planning Authority that they would not have adverse impacts or impede access to a watercourse, floodplain or flood protection and management facilities, or increase the risk of flooding to other locations. The nature and design of structural and non-structural flood risk management measures required for development in such areas will also be required to be demonstrated, to ensure that flood hazard and risk will not be increased. Measures proposed shall follow best practice in the management of health and safety for users and residents of the development.

Specifications for developments in flood vulnerable areas set out in this Plan shall be complied with as appropriate (Please also refer to CPO 5.120 and DMS16.206).

Drumlish

Drumlish is situated in the north of the County. The settlement's organic development around a central crossroads provides a compact core for Drumlish and lends the village a sense of cohesion. Historically, Drumlish takes its name from the Irish meaning for 'sheltered hillside'. Originally part of the ancient parish of Killoe, Drumlish obtained independence and became known as the parish of Monaduff in 1822. In 1834, the parish then became known as Drumlish.

Town Core:

To provide for the development and enhancement of town core uses including retail, residential, commercial, civic and other uses.

The purpose of this zoning is to protect and enhance the special character of the town centre and to provide for and improve retailing, residential, commercial, cultural and other uses appropriate to the centre of Drumlish. This zoning provides for the consolidated development and growth of the town centre, allowing for a broad range of compatible and complementary uses which will be encouraged to locate in this area. Development will be expected to contribute to a dynamic, vibrant and pedestrian focused town core with a strong urban design approach. The Council will encourage the appropriate re-use, adaptation and regeneration of buildings, backlands, derelict and obsolete lands including residential development above retail and commercial premises in the town centre.

Development carried out under this zoning should have regard to the mix of uses of the zoning, and, in particular, shall have regard to the retail policy for the County. Developers should be cognisant of the high profile locations of this zoning and design, wherein siting and materials should be chosen accordingly.

New Residential

To provide for new residential development in tandem with the provision of the necessary social and physical infrastructure.

The principles of sustainable development shall be taken into account when considering applications for residential development in the area, including the use of appropriate housing densities, natural, locally sourced materials, energy efficiency and transport implications, the impact on the existing ecology and compatibility with local environmental conditions.

Where appropriate, development design proposals shall provide for further access to adjacent zones of residential lands in order to facilitate their future access and development.

Residential

To provide for residential development and protect and improve residential amenity.

This zoning is intended primarily for established housing development but may include a range of other uses particularly those that have the potential to improve the residential amenity of residential communities such as schools, crèches, small shops, doctor's surgeries, small scale residential, playing fields, etc.

Potential sites may range from small gap infill, unused or derelict land and backland areas, side gardens of existing houses, up to larger undeveloped sites within an established residential area. A balance must be struck between the reasonable protection of the amenities and privacy of adjoining dwellings, the protection of established character and the need to provide infill development. Proposals for development involving the intensification of residential uses within existing residential areas will need to clearly demonstrate that the proposal respects the existing character of the area and would not harm the amenity value of adjacent properties.

Within this zoning category the improved quality of existing residential areas will be the Council's priority.

Commercial/Industrial/Warehousing

To primarily provide for industrial/workshop and warehouse development including compatible uses such as offices and distribution.

Zonings of industrial nature are indicative and are adaptable to the nature, size and requirements of future employment/industrial development. The creation of local employment opportunities is the primary aim of this zoning. Hi-tech business/office, and light industrial developments will be considered within this zoning.

In certain instances, brownfield sites of a strategic nature may be considered for business use including compatible uses such as offices and distribution subject to compliance with all relevant development control standards.

Where appropriate, development design proposals shall provide for further access to adjacent zones of industrial lands in order to facilitate their future access and development.

Strategic Residential Reserve

To provide for the longer-term housing requirements of the town.

Residential development, other than that set out below, will not be permitted on these lands during the lifetime of the Plan (It should be noted that lands zoned for the purposes of strategic residential reserve may be released for development over future plan periods). The following residential type of development may be considered acceptable:

- 1) Where there is a live permission for residential development that has not been activated.
The life of these permissions may be extended in accordance with the provisions of Section 42A of the Planning & Development Act 2010, (as

- amended). Proposals for new developments will not be considered over the lifetime of the current plan period.
- 2) A proposal for a single dwelling house may be considered under this zoning where:
 - a) the unit to be provided will serve as the permanent place of residence of the landowner or a member of his/her immediate family.
 - b) and where it can be clearly demonstrated that the provision of such a unit would not compromise the ability of the wider area of zoned land to be developed in the future.
 - c) and the dwelling would easily integrate with the existing and future development of the lands and those in the vicinity.
 - 3) In exceptional circumstances where it can be clearly demonstrated by the developer that there is a significant difficulty in the release or identification of lands for a specific residential type development, consideration will be given to the release of lands zoned Strategic Residential Reserve, subject to established planning criteria and including in particular:
 - a) The requirement to remain within the overall residential land use targets as set out in the Core Strategy.
 - b) The lands are being developed in a sequential manner.
 - c) It has been clearly justified and demonstrated, to the satisfaction of the Planning Authority, that there is a clear discrepancy between the supply and release of residentially zoned lands and the demand for residential units.

Certain developments that can demonstrate a strategic element, (e.g. a significant commercial or social element), may be deemed acceptable.

Strategic Industrial Reserve

To provide for the longer term industrial/workshop, warehouse and commercial or business development including compatible uses such as offices and distribution.

Where there is a live permission for industrial development that has not been activated, the life of these permissions may be extended in accordance with the provisions of Section 42A of the Planning & Development Act 2000, (as amended). New permission will not be considered.

Proposals for single small-scale industrial units <500m² are considered appropriate on these lands where it can be demonstrated that such provision would not compromise the future ability of the adjoining lands to be developed as part of an overall scheme and that the development would integrate successfully with any future development. In addition, where it has been clearly justified and demonstrated, to the satisfaction of the Planning Authority, that there is a clear discrepancy between the supply and release of industrial zoned lands and the demand for specific industrial development, consideration will be given to the release of lands zoned Strategic Industrial Reserve for these purposes.

Social/Community/Education/Public Utility

To primarily provide for educational, health, social, cultural, religious and community facilities.

This zoning provides for facilities that serve the community as a whole such as schools, community centres, creches, nursing homes, etc.

Recreation/Amenity and Green Spaces

To primarily provide for recreational open space, environmental buffers and ancillary structures.

To preserve, provide for and improve active and passive recreational public and private open space, environmental buffers and ancillary structures. The areas included in this zoning objective cover both private and public open space and are dispersed throughout urban centres of every size. The Council will not normally permit development that would result in a loss of open space.

This zoning provides for open spaces, parks and development incidental to the enjoyment of open space including sport and leisure facilities such as a clubhouse, changing rooms, meeting rooms, a gym, sports training halls, catering facilities, caretaker accommodation.

The zoning also provides for the reservation of environmental buffers at strategic corridors and further facilitates the protection of existing green areas and public open spaces which provide for the passive and active recreational needs and provides for the use of such land or such facilities for games, educational and recreational purposes.

Village Walkway

The village walkway would provide a recreational backbone to the town which would provide a wildlife corridor and a potential link to other walking routes, facilitating the establishment of a pedestrian network of pathways.

Where appropriate, the village walkway shall be provided as part of any development.

Constrained Land Use

To facilitate the appropriate management and sustainable use of flood risk areas.

This objective limits new development, while recognising that existing development uses within these zones may require small scale development, as outlined below, over the life of the Plan, which would contribute towards the compact and sustainable urban development of the County's zoned settlements.

The underlying zoning or the existing permitted uses are deemed to be acceptable in principle for minor developments to existing buildings (such as small extensions to houses, most changes of use of existing buildings), which are unlikely to raise

significant flooding issues, provided they do not obstruct important flow paths, introduce a significant additional number of people into flood risk areas or entail the storage of hazardous substances.

Development proposals within this zone shall be accompanied by a detailed Flood Risk Assessment, carried out in accordance with *The Planning System and Flood Risk Assessment Guidelines* and *Circular PL 2/2014* (or as updated), which shall assess the risks of flooding associated with the proposed development.

Proposals shall only be considered where it is demonstrated to the satisfaction of the Planning Authority that they would not have adverse impacts or impede access to a watercourse, floodplain or flood protection and management facilities, or increase the risk of flooding to other locations. The nature and design of structural and non-structural flood risk management measures required for development in such areas will also be required to be demonstrated, to ensure that flood hazard and risk will not be increased. Measures proposed shall follow best practice in the management of health and safety for users and residents of the development.

Specifications for developments in flood vulnerable areas set out in this Plan shall be complied with as appropriate (Please also refer to CPO 5.120 and DMS16.206).

Keenagh

Keenagh situated in the south of the County adjacent to the Royal Canal, is a picturesque settlement with a wide main street and relatively charming street frontage. The name Keenagh derives from the Irish word 'Caonach' meaning moss. The village was accordingly named after acres of land on which moss grew on stone around the Mosstown Estate. The village itself was built around the estate by the Kingstons between the years of 1837 to 1843.

Town Core:

To provide for the development and enhancement of town core uses including retail, residential, commercial, civic and other uses.

The purpose of this zoning is to protect and enhance the special character of the town centre and to provide for and improve retailing, residential, commercial, cultural and other uses appropriate to the centre of Keenagh. This zoning provides for the consolidated development and growth of the town centre, allowing for a broad range of compatible and complementary uses which will be encouraged to locate in this area. Development will be expected to contribute to a dynamic, vibrant and pedestrian focused town core with a strong urban design approach. The Council will encourage the appropriate re-use, adaptation and regeneration of buildings, backlands, derelict and obsolete lands including residential development above retail and commercial premises in the town centre.

Development carried out under this zoning should have regard to the mix of uses of the zoning, and, in particular, shall have regard to the retail policy for the County. Developers should be cognisant of the high profile locations of this zoning and design, wherein siting and materials should be chosen accordingly to ensure that any additional developments enhance the existing attractive streetscape.

Expansion of existing and local level retail provision where appropriate, will be considered within this zoning.

New Residential

To provide for new residential development in tandem with the provision of the necessary social and physical infrastructure.

The principles of sustainable development shall be taken into account when considering applications for residential development in the area, including the use of appropriate housing densities, natural, locally sourced materials, energy efficiency and transport implications, the impact on the existing ecology and compatibility with local environmental conditions.

Residential

To provide for residential development and protect and improve residential amenity.

This zoning is intended primarily for established housing development but may include a range of other uses particularly those that have the potential to improve the residential amenity of residential communities such as schools, crèches, small shops, doctor's surgeries, small scale residential, playing fields, etc.

Potential sites may range from small gap infill, unused or derelict land and backland areas, side gardens of existing houses, up to larger undeveloped sites within an established residential area. A balance must be struck between the reasonable protection of the amenities and privacy of adjoining dwellings, the protection of established character and the need to provide infill development. Proposals for development involving the intensification of residential uses within existing residential areas will need to clearly demonstrate that the proposal respects the existing character of the area and would not harm the amenity value of adjacent properties.

Within this zoning category the improved quality of existing residential areas will be the Council's priority.

Strategic Residential Reserve

To provide for the longer-term housing requirements of the town

Residential development, other than that set out below, will not be permitted on these lands during the lifetime of the Plan (It should be noted that lands zoned for the purposes of strategic residential reserve may be released for development over future plan periods). The following residential type of development may be considered acceptable:

- 1) Where there is a live permission for residential development that has not been activated.
The life of these permissions may be extended in accordance with the provisions of Section 42A of the Planning & Development Act 2000, (as amended). Proposals for new developments will not be considered over the lifetime of the current plan period.
- 2) A proposal for a single dwelling house may be considered under this zoning where:
 - a) the unit to be provided will serve as the permanent place of residence of the landowner or a member of his/her immediate family.
 - b) and where it can be clearly demonstrated that the provision of such a unit would not compromise the ability of the wider area of zoned land to be developed in the future.
 - c) and the dwelling would easily integrate with the existing and future development of the lands and those in the vicinity.
- 3) In exceptional circumstances where it can be clearly demonstrated by the developer that there is a significant difficulty in the release or identification of lands for a specific residential type development, consideration will be given to the release of lands zoned Strategic Residential Reserve, subject to established planning criteria and including in particular:
 - a) The requirement to remain within the overall residential land use targets as set out in the Core Strategy.
 - b) The lands are being developed in a sequential manner.

c) It has been clearly justified and demonstrated, to the satisfaction of the Planning Authority, that there is a clear discrepancy between the supply and release of residentially zoned lands and the demand for residential units.

Certain developments that can demonstrate a strategic element, (e.g. a significant commercial or social element), may be deemed acceptable.

Social/Community/Public Utility

To primarily provide for educational, health, social, cultural, religious and community facilities.

This zoning encompasses community uses (such as schools, churches, OPDs etc.), public utility and social/administrative designations such as the Fire and Garda Stations. Expansion of these services will be facilitated where needed and compatible with adjoining land uses.

Recreation/Amenity and Green Spaces

To primarily provide for recreational open space, environmental buffers and ancillary structures.

To preserve, provide for and improve active and passive recreational public and private open space, environmental buffers and ancillary structures. The areas included in this zoning objective cover both private and public open space and are dispersed throughout urban centres of every size. The Council will not normally permit development that would result in a loss of open space.

This zoning provides for open spaces, parks and development incidental to the enjoyment of open space including sport and leisure facilities such as a clubhouse, changing rooms, meeting rooms, a gym, sports training halls, catering facilities, caretaker accommodation.

The zoning also provides for the reservation of environmental buffers at strategic corridors and further facilitates the protection of existing green areas and public open spaces which provide for the passive and active recreational needs and provides for the use of such land or such facilities for games, educational and recreational purposes.

Legan

Legan is situated to the south of the County with a river running around the extent of the settlement. The River Inny is situated two miles south-east of the settlement. The name is also known as Lenamore (Irish: *An Léana Mór*, meaning "the great water-meadow") after the local watercourse the Lenamore Stream. A bridge spans the stream at the entrance to the village and has been a local feature since about 1775. The names therefore come from the proximity of the village to the bridge and the stream.

Town Core:

To provide for the development and enhancement of town core uses including retail, residential, commercial, civic and other uses.

The purpose of this zoning is to protect and enhance the special character of the town centre and to provide for and improve retailing, residential, commercial, cultural and other uses appropriate to the centre of Legan. This zoning provides for the consolidated development and growth of the town centre, allowing for a broad range of compatible and complementary uses which will be encouraged to locate in this area. Development will be expected to contribute to a dynamic, vibrant and pedestrian focused town core with a strong urban design approach. The Council will encourage the appropriate re-use, adaptation and regeneration of buildings, backlands, derelict and obsolete lands including residential development above retail and commercial premises in the town centre.

Development carried out under this zoning should have regard to the mix of uses of the zoning, and, in particular, shall have regard to the retail policy for the County. Developers should be cognisant of the high profile locations of this zoning and design, wherein siting and materials should be chosen accordingly to ensure that any additional developments enhance the existing attractive streetscape.

New Residential

To provide for new residential development in tandem with the provision of the necessary social and physical infrastructure.

The principles of sustainable development shall be taken into account when considering applications for residential development in the area, including the use of appropriate housing densities, natural, locally sourced materials, energy efficiency and transport implications, the impact on the existing ecology and compatibility with local environmental conditions.

Residential

To provide for residential development and protect and improve residential amenity.

This zoning is intended primarily for established housing development but may include a range of other uses particularly those that have the potential to improve the

residential amenity of residential communities such as schools, crèches, small shops, doctor's surgeries, small scale residential, playing fields, etc.

Potential sites may range from small gap infill, unused or derelict land and backland areas, side gardens of existing houses, up to larger undeveloped sites within an established residential area. A balance must be struck between the reasonable protection of the amenities and privacy of adjoining dwellings, the protection of established character and the need to provide infill development. Proposals for development involving the intensification of residential uses within existing residential areas will need to clearly demonstrate that the proposal respects the existing character of the area and would not harm the amenity value of adjacent properties.

Within this zoning category the improved quality of existing residential areas will be the Council's priority.

Strategic Residential Reserve

To provide for the longer-term housing requirements of the town

Residential development, other than that set out below, will not be permitted on these lands during the lifetime of the Plan (It should be noted that lands zoned for the purposes of strategic residential reserve may be released for development over future plan periods). The following residential type of development may be considered acceptable:

- 1) Where there is a live permission for residential development that has not been activated.
The life of these permissions may be extended in accordance with the provisions of Section 42A of the Planning & Development Act 2000, (as amended). Proposals for new developments will not be considered over the lifetime of the current plan period.
- 2) A proposal for a single dwelling house may be considered under this zoning where:
 - a) the unit to be provided will serve as the permanent place of residence of the landowner or a member of his/her immediate family.
 - b) and where it can be clearly demonstrated that the provision of such a unit would not compromise the ability of the wider area of zoned land to be developed in the future.
 - c) and the dwelling would easily integrate with the existing and future development of the lands and those in the vicinity.
- 3) In exceptional circumstances where it can be clearly demonstrated by the developer that there is a significant difficulty in the release or identification of lands for a specific residential type development, consideration will be given to the release of lands zoned Strategic Residential Reserve, subject to established planning criteria and including in particular:
 - a) The requirement to remain within the overall residential land use targets as set out in the Core Strategy.
 - b) The lands are being developed in a sequential manner.
 - c) It has been clearly justified and demonstrated, to the satisfaction of the Planning Authority, that there is a clear discrepancy between the

supply and release of residentially zoned lands and the demand for residential units.

Certain developments that can demonstrate a strategic element, (e.g. a significant commercial or social element), may be deemed acceptable.

Social/Community/Education/Public Utility

To primarily provide for educational, health, social, cultural, religious and community facilities.

This zoning provides for facilities that serve the community as a whole such as schools, community centres, creches, nursing homes, churches etc.

This zoning also provides for sport and leisure facilities such as a clubhouse, changing rooms, meeting rooms, a gym, sports training halls, catering facilities, caretaker accommodation.

Recreation/Amenity and Green Spaces

To primarily provide for recreational open space, environmental buffers and ancillary structures.

To preserve, provide for and improve active and passive recreational public and private open space, environmental buffers and ancillary structures. The areas included in this zoning objective cover both private and public open space and are dispersed throughout urban centres of every size. The Council will not normally permit development that would result in a loss of open space.

This zoning provides for open spaces, parks and development incidental to the enjoyment of open space including sport and leisure facilities such as a clubhouse, changing rooms, meeting rooms, a gym, sports training halls, catering facilities, caretaker accommodation.

The zoning also provides for the reservation of environmental buffers at strategic corridors and further facilitates the protection of existing green areas and public open spaces which provide for the passive and active recreational needs and provides for the use of such land or such facilities for games, educational and recreational purposes.

Constrained Land Use

To facilitate the appropriate management and sustainable use of flood risk areas.

This objective limits new development, while recognising that existing development uses within these zones may require small scale development, as outlined below, over the life of the Plan, which would contribute towards the compact and sustainable urban development of the County's zoned settlements.

The underlying zoning or the existing permitted uses are deemed to be acceptable in principle for minor developments to existing buildings (such as small extensions to houses, most changes of use of existing buildings), which are unlikely to raise significant flooding issues, provided they do not obstruct important flow paths, introduce a significant additional number of people into flood risk areas or entail the storage of hazardous substances.

Development proposals within this zone shall be accompanied by a detailed Flood Risk Assessment, carried out in accordance with *The Planning System and Flood Risk Assessment Guidelines* and *Circular PL 2/2014* (or as updated), which shall assess the risks of flooding associated with the proposed development.

Proposals shall only be considered where it is demonstrated to the satisfaction of the Planning Authority that they would not have adverse impacts or impede access to a watercourse, floodplain or flood protection and management facilities, or increase the risk of flooding to other locations. The nature and design of structural and non-structural flood risk management measures required for development in such areas will also be required to be demonstrated, to ensure that flood hazard and risk will not be increased. Measures proposed shall follow best practice in the management of health and safety for users and residents of the development.

Specifications for developments in flood vulnerable areas set out in this Plan shall be complied with as appropriate (Please also refer to CPO 5.120 and DMS16.206).

Newtownforbes

Newtownforbes (Lios Breac, meaning "the speckled ringfort") is located along the N4 National primary route 4km to the northwest of Longford Town. Newtownforbes takes its name from the Forbes family, also known as the Earl of Granard, who originated in Aberdeen and were granted lands in the area around 1621 and have been resident in Castleforbes since 1691.

Town Core:

To provide for the development and enhancement of town core uses including retail, residential, commercial, civic and other uses.

The purpose of this zoning is to protect and enhance the special character of the town centre and to provide for and improve retailing, residential, commercial, cultural and other uses appropriate to the centre of Newtownforbes. This zoning provides for the consolidated development and growth of the town centre, allowing for a broad range of compatible and complementary uses which will be encouraged to locate in this area. Development will be expected to contribute to a dynamic, vibrant and pedestrian focused town core with a strong urban design approach. The Council will encourage the appropriate re-use, adaptation and regeneration of buildings, backlands, derelict and obsolete lands including residential development above retail and commercial premises in the town centre.

Development carried out under this zoning should have regard to the mix of uses of the zoning, and, in particular, shall have regard to the retail policy for the County. Developers should be cognisant of the high profile locations of this zoning and design, wherein siting and materials should be chosen accordingly to ensure that any additional developments enhance the existing attractive streetscape.

New Residential

To provide for new residential development in tandem with the provision of the necessary social and physical infrastructure.

The principles of sustainable development shall be taken into account when considering applications for residential development in the area, including the use of appropriate housing densities, natural, locally sourced materials, energy efficiency and transport implications, the impact on the existing ecology and compatibility with local environmental conditions.

Residential

To provide for residential development and protect and improve residential amenity.

This zoning is intended primarily for established housing development but may include a range of other uses particularly those that have the potential to improve the residential amenity of residential communities such as schools, crèches, small shops, doctor's surgeries, small scale residential, playing fields, etc.

Potential sites may range from small gap infill, unused or derelict land and backland areas, side gardens of existing houses, up to larger undeveloped sites within an established residential area. A balance must be struck between the reasonable protection of the amenities and privacy of adjoining dwellings, the protection of established character and the need to provide infill development. Proposals for development involving the intensification of residential uses within existing residential areas will need to clearly demonstrate that the proposal respects the existing character of the area and would not harm the amenity value of adjacent properties.

Within this zoning category the improved quality of existing residential areas will be the Council's priority.

Social/Community/Education/Public Utility

To primarily provide for educational, health, social, cultural, religious and community facilities.

This zoning encompasses community uses (such as schools, churches, OPDs etc.), public utility and social/administrative designations such as the Fire and Garda Stations. Expansion of these services will be facilitated where needed and compatible with adjoining land uses.

Recreation/Amenity and Green Spaces

To primarily provide for recreational open space, environmental buffers and ancillary structures.

To preserve, provide for and improve active and passive recreational public and private open space, environmental buffers and ancillary structures. The areas included in this zoning objective cover both private and public open space and are dispersed throughout urban centres of every size. The Council will not normally permit development that would result in a loss of open space.

This zoning provides for open spaces, parks and development incidental to the enjoyment of open space including sport and leisure facilities such as a clubhouse, changing rooms, meeting rooms, a gym, sports training halls, catering facilities, caretaker accommodation.

The zoning also provides for the reservation of environmental buffers at strategic corridors and further facilitates the protection of existing green areas and public open spaces which provide for the passive and active recreational needs and provides for the use of such land or such facilities for games, educational and recreational purposes.

Tourism and Events

To realise the tourism potential of the area.

This objective provides for the development of Arts, culture and entertainment facilities. The zoning also provides for the facilitation of festivals and related events. Cognisance of the heritage of the site should be had as part of any proposal for development under this zoning.

Strategic Residential Reserve

To provide for the longer-term housing requirements of the town

Residential development, other than that set out below, will not be permitted on these lands during the lifetime of the Plan (It should be noted that lands zoned for the purposes of strategic residential reserve may be released for development over future plan periods). The following residential type development may be considered acceptable:

- 1) Where there is a live permission for residential development that has not been activated.
The life of these permissions may be extended in accordance with the provisions of Section 42A of the Planning & Development Act 2000, (as amended). Proposals for new developments will not be considered over the lifetime of the current plan period.
- 2) A proposal for a single dwelling house may be considered under this zoning where:
 - a) the unit to be provided will serve as the permanent place of residence of the landowner or a member of his/her immediate family.
 - b) and where it can be clearly demonstrated that the provision of such a unit would not compromise the ability of the wider area of zoned land to be developed in the future.
 - c) and the dwelling would easily integrate with the existing and future development of the lands and those in the vicinity.
- 3) In exceptional circumstances where it can be clearly demonstrated by the developer that there is a significant difficulty in the release or identification of lands for a specific residential type development, consideration will be given to the release of lands zoned Strategic Residential Reserve, subject to established planning criteria and including in particular:
 - a) The requirement to remain within the overall residential land use targets as set out in the Core Strategy.
 - b) The lands are being developed in a sequential manner.
 - c) It has been clearly justified and demonstrated, to the satisfaction of the Planning Authority, that there is a clear discrepancy between the supply and release of residentially zoned lands and the demand for residential units.

Certain developments that can demonstrate a strategic element, (e.g. a significant commercial or social element), may be deemed acceptable.

Appendix 1E: Serviced Rural Villages Abbeyshrule, Ardagh, Ballinamuck, and Clondra

Serviced Rural Villages - Abbeyshrule, Ardagh, Ballinamuck, and Clondra

Serviced Rural Villages have a limited level of services. In County Longford this relates to the following 4 no. settlements; Abbeyshrule, Ardagh, Ballinamuck and Clondra.

Abbeyshrule

Abbeyshrule, located in the south east of the County is situated on the River Inny, which flows through the town on the eastern boundary, and the Royal Canal which forms the western perimeter of the town. Abbeyshrule takes its name from the Gaelic word for stream or a river.

Town Core:

To provide for the development and enhancement of town core uses including retail, residential, commercial, civic and other uses.

The purpose of this zoning is to protect and enhance the special character of the town centre and to provide for and improve retailing, residential, commercial, cultural and other uses appropriate to the centre of Abbeyshrule. This zoning provides for the consolidated development and growth of the town centre, allowing for a broad range of compatible and complementary uses which will be encouraged to locate in this area. Development will be expected to contribute to a dynamic, vibrant and pedestrian focused town core with a strong urban design approach. The Council will encourage the appropriate re-use, adaptation and regeneration of buildings, backlands, derelict and obsolete lands including residential development above retail and commercial premises in the town centre.

Development carried out under this zoning should have regard to the mix of uses of the zoning, and, in particular, shall have regard to the retail policy for the County. Developers should be cognisant of the high profile locations of this zoning and design, wherein siting and materials should be chosen accordingly to ensure that any additional developments enhance the existing attractive streetscape.

Residential

To provide for residential development and protect and improve residential amenity.

This zoning is intended primarily for established housing development but may include a range of other uses particularly those that have the potential to improve the residential amenity of residential communities such as schools, crèches, small shops, doctor's surgeries, small scale residential, playing fields, etc.

Potential sites may range from small gap infill, unused or derelict land and backland areas, side gardens of existing houses, up to larger undeveloped sites within an established residential area. A balance must be struck between the reasonable

protection of the amenities and privacy of adjoining dwellings, the protection of established character and the need to provide infill development. Proposals for development involving the intensification of residential uses within existing residential areas will need to clearly demonstrate that the proposal respects the existing character of the area and would not harm the amenity value of adjacent properties.

Within this zoning category the improved quality of existing residential areas will be the Council's priority.

Strategic Residential Reserve

To provide for the longer-term housing requirements of the town

Residential development, other than that set out below, will not be permitted on these lands during the lifetime of the Plan (It should be noted that lands zoned for the purposes of strategic residential reserve may be released for development over future plan periods). The following residential type of development may be considered acceptable:

- 1) Where there is a live permission for residential development that has not been activated.
The life of these permissions may be extended in accordance with the provisions of Section 42A of the Planning & Development Act 2000, (as amended). Proposals for new developments will not be considered over the lifetime of the current plan period.
- 2) A proposal for a single dwelling house may be considered under this zoning where:
 - a) the unit to be provided will serve as the permanent place of residence of the landowner or a member of his/her immediate family.
 - b) and where it can be clearly demonstrated that the provision of such a unit would not compromise the ability of the wider area of zoned land to be developed in the future.
 - c) and the dwelling would easily integrate with the existing and future development of the lands and those in the vicinity.
- 3) In exceptional circumstances where it can be clearly demonstrated by the developer that there is a significant difficulty in the release or identification of lands for a specific residential type development, consideration will be given to the release of lands zoned Strategic Residential Reserve, subject to established planning criteria and including in particular:
 - a) The requirement to remain within the overall residential land use targets as set out in the Core Strategy.
 - b) The lands are being developed in a sequential manner.
 - c) It has been clearly justified and demonstrated, to the satisfaction of the Planning Authority, that there is a clear discrepancy between the supply and release of residentially zoned lands and the demand for residential units.

Certain developments that can demonstrate a strategic element, (e.g. a significant commercial or social element), may be deemed acceptable.

Airport Development Objective

To provide for Airport related activities and the expansion of existing Air Facilities.

This zoning provides for the consolidation and expansion of existing airport services at Abbeyshrule including passenger buildings and services, airport infrastructure, hangerage, storage, maintenance and ancillary facilities, transport depot, training facilities, storage depot, warehouse, offices and light industrial/enterprise units to provide for appropriate employment uses directly related to such activities and operations only.

All developments in this zone will be required to comply with all Irish Aviation Authority standards.

Recreation/Amenity and Green Spaces

To primarily provide for recreational open space, environmental buffers and ancillary structures.

To preserve, provide for and improve active and passive recreational public and private open space, environmental buffers and ancillary structures. The areas included in this zoning objective cover both private and public open space and are dispersed throughout urban centres of every size. The Council will not normally permit development that would result in a loss of open space.

This zoning provides for open spaces, parks and development incidental to the enjoyment of open space including sport and leisure facilities such as a clubhouse, changing rooms, meeting rooms, a gym, sports training halls, catering facilities, caretaker accommodation.

The zoning also provides for the reservation of environmental buffers at strategic corridors throughout the town in order to provide a visual barrier between different land uses and ensure the protection of the town's watercourses, maintaining an important wildlife corridor and enhancing the aesthetics of the area.

The zoning further facilitates the protection of existing green areas and public open spaces which provide for the passive and active recreational needs and provides for the use of such land or such facilities for games, educational and recreational purposes.

Social/Community/Education/Public Utility

To primarily provide for educational, health, social, cultural, religious and community facilities.

This zoning encompasses community uses (such as schools, churches, OPDs etc.), public utility and social/administrative designations such as the Fire and Garda Stations. Expansion of these services will be facilitated where needed and compatible with adjoining land uses.

Constrained Land Use

To facilitate the appropriate management and sustainable use of flood risk areas.

This objective limits new development, while recognising that existing development uses within these zones may require small scale development, as outlined below, over the life of the Plan, which would contribute towards the compact and sustainable urban development of the County's zoned settlements.

The underlying zoning or the existing permitted uses are deemed to be acceptable in principle for minor developments to existing buildings (such as small extensions to houses, most changes of use of existing buildings), which are unlikely to raise significant flooding issues, provided they do not obstruct important flow paths, introduce a significant additional number of people into flood risk areas or entail the storage of hazardous substances.

Development proposals within this zone shall be accompanied by a detailed Flood Risk Assessment, carried out in accordance with *The Planning System and Flood Risk Assessment Guidelines* and *Circular PL 2/2014* (or as updated), which shall assess the risks of flooding associated with the proposed development.

Proposals shall only be considered where it is demonstrated to the satisfaction of the Planning Authority that they would not have adverse impacts or impede access to a watercourse, floodplain or flood protection and management facilities, or increase the risk of flooding to other locations. The nature and design of structural and non-structural flood risk management measures required for development in such areas will also be required to be demonstrated, to ensure that flood hazard and risk will not be increased. Measures proposed shall follow best practice in the management of health and safety for users and residents of the development.

Specifications for developments in flood vulnerable areas set out in this Plan shall be complied with as appropriate (Please also refer to CPO 5.120 and DMS16.206).

Ardagh

Ardagh or Árd Achadh, meaning high field, situated beside the ancient Ardagh Mountain, is a picturesque village, located in the southern part of County Longford to the south-east of Longford town and south-west of Edgeworthstown. It is a traditional rural Irish village with a combination of rustic houses and fine churches.

Town Core

To provide for the development and enhancement of town core uses including retail, residential, commercial, civic and other uses.

The purpose of this zoning is to protect and enhance the special character of the town centre and to provide for and improve retailing, residential, commercial, cultural and other uses appropriate to the centre of Ardagh. This zoning provides for the consolidated development and growth of the town centre, allowing for a broad range of compatible and complementary uses which will be encouraged to locate in this area. Development will be expected to contribute to a dynamic, vibrant and pedestrian focused town core with a strong urban design approach. The Council will encourage the appropriate re-use, adaptation and regeneration of buildings, backlands, derelict and obsolete lands including residential development above retail and commercial premises in the town centre.

Development carried out under this zoning should have regard to the mix of uses of the zoning, and, in particular, shall have regard to the retail policy for the County. Developers should be cognisant of the high profile locations of this zoning and design, wherein siting and materials should be chosen accordingly to ensure that any additional developments enhance the existing attractive streetscape.

New Residential

To provide for new residential development in tandem with the provision of the necessary social and physical infrastructure.

The principles of sustainable development shall be taken into account when considering applications for residential development in the area, including the use of appropriate housing densities, natural, locally sourced materials, energy efficiency and transport implications, the impact on the existing ecology and compatibility with local environmental conditions.

Residential

To provide for residential development and protect and improve residential amenity.

This zoning is intended primarily for established housing development but may include a range of other uses particularly those that have the potential to improve the residential amenity of residential communities such as schools, crèches, small shops, doctor's surgeries, small scale residential, playing fields, etc.

Potential sites may range from small gap infill, unused or derelict land and back land areas, side gardens of existing houses, up to larger undeveloped sites within an established residential area. A balance must be struck between the reasonable protection of the amenities and privacy of adjoining dwellings, the protection of established character and the need to protect the architectural character and conservation status of Ardagh Village. Proposals for development involving the intensification of residential uses within existing residential areas will need to clearly demonstrate that the proposal respects the existing character of the area and would not harm the amenity value of adjacent properties. In addition, the existing Neighbourhood Park which is located between the eastern lodge house at the main gate and the Old Ardagh School/Heritage Centre shall be protected from any new development other than the proper maintenance of any existing septic tank and fencing which may exist on the site.

Within this zoning category the category the protection of the architectural character of the area and the improved quality of existing residential areas will be the Council's priority.

Strategic Residential Reserve

To provide for the longer-term housing requirements of the town.

Residential development, other than that set out below, will not be permitted on these lands during the lifetime of the Plan (It should be noted that lands zoned for the purposes of strategic residential reserve may be released for development over future plan periods). The following residential type of development may be considered acceptable:

- 1) Where there is a live permission for residential development that has not been activated.
The life of these permissions may be extended in accordance with the provisions of Section 42A of the Planning & Development Act 2000, (as amended). Proposals for new developments will not be considered over the lifetime of the current plan period.
- 2) A proposal for a single dwelling house may be considered under this zoning where:
 - a) the unit to be provided will serve as the permanent place of residence of the landowner or a member of his/her immediate family.
 - b) and where it can be clearly demonstrated that the provision of such a unit would not compromise the ability of the wider area of zoned land to be developed in the future.
 - c) and the dwelling would easily integrate with the existing and future development of the lands and those in the vicinity.
- 3) In exceptional circumstances where it can be clearly demonstrated by the developer that there is a significant difficulty in the release or identification of lands for a specific residential type development, consideration will be given to the release of lands zoned Strategic Residential Reserve, subject to established planning criteria and including in particular:

- a) The requirement to remain within the overall residential land use targets as set out in the Core Strategy.
- b) The lands are being developed in a sequential manner.
- c) It has been clearly justified and demonstrated, to the satisfaction of the Planning Authority, that there is a clear discrepancy between the supply and release of residentially zoned lands and the demand for residential units.

Certain developments that can demonstrate a strategic element, (e.g. a significant commercial or social element), may be deemed acceptable.

Recreation/Amenity and Green Spaces

To primarily provide for recreational open space, environmental buffers and ancillary structures.

To preserve, provide for and improve active and passive recreational public and private open space, environmental buffers and ancillary structures. The areas included in this zoning objective cover both private and public open space and are dispersed throughout urban centres of every size. The Council will not normally permit development that would result in a loss of open space.

This zoning provides for open spaces, parks and development incidental to the enjoyment of open space including sport and leisure facilities such as a clubhouse, changing rooms, meeting rooms, a gym, sports training halls, catering facilities, caretaker accommodation.

The zoning also provides for the reservation of environmental buffers at strategic corridors throughout the town in order to provide a visual barrier between different land uses and ensure the protection of the town's natural assets, maintain an important wildlife corridor, enhancing the aesthetics of the area and providing important amenity areas.

The zoning further facilitates the protection of existing green areas and public open spaces which provide for the passive and active recreational needs and provides for the use of such land or such facilities for games, educational and recreational purposes.

Social/Community/Education/Public Utility

To primarily provide for educational, health, social, cultural, religious and community facilities.

This zoning encompasses community uses (such as schools, churches, OPDs etc.), public utility and social/administrative designations such as the Fire and Garda Stations. Expansion of these services will be facilitated where needed and compatible with adjoining land uses.

Constrained Land Use

To facilitate the appropriate management and sustainable use of flood risk areas.

This objective limits new development, while recognising that existing development uses within these zones may require small scale development, as outlined below, over the life of the Plan, which would contribute towards the compact and sustainable urban development of the County's zoned settlements.

The underlying zoning or the existing permitted uses are deemed to be acceptable in principle for minor developments to existing buildings (such as small extensions to houses, most changes of use of existing buildings), which are unlikely to raise significant flooding issues, provided they do not obstruct important flow paths, introduce a significant additional number of people into flood risk areas or entail the storage of hazardous substances.

Development proposals within this zone shall be accompanied by a detailed Flood Risk Assessment, carried out in accordance with *The Planning System and Flood Risk Assessment Guidelines* and *Circular PL 2/2014* (or as updated), which shall assess the risks of flooding associated with the proposed development.

Proposals shall only be considered where it is demonstrated to the satisfaction of the Planning Authority that they would not have adverse impacts or impede access to a watercourse, floodplain or flood protection and management facilities, or increase the risk of flooding to other locations. The nature and design of structural and non-structural flood risk management measures required for development in such areas will also be required to be demonstrated, to ensure that flood hazard and risk will not be increased. Ballinamuck

Ballinamuck is a settlement located in the north west of the County. The settlement was the scene of the Battle of Ballinamuck, where a French army aiding the United Irishmen rebellion of 1798, was defeated. Ballinamuck or Béal Átha na Muc, means "mouth of the pig's ford".

Town Core

To provide for the development and enhancement of town core uses including retail, residential, commercial, civic and other uses.

Development carried out under this zoning should have regard to the mix of uses of the zoning, and, in particular, shall have regard to the retail policy for the County. Developers should be cognisant of the high profile locations of this zoning and design, wherein siting and materials should be chosen accordingly to ensure that any additional developments enhance the existing attractive streetscape.

The purpose of this zoning is to protect and enhance the special character of the town centre and to provide for and improve retailing, residential, commercial, cultural and other uses appropriate to the centre of Ballinamuck.

This zoning provides for the consolidated development and growth of the town centre, allowing for a broad range of compatible and complementary uses which will be encouraged to locate in this area. Development will be expected to contribute to a dynamic, vibrant and pedestrian focused town core with a strong urban design approach.

The Council will encourage the appropriate re-use, adaptation and regeneration of buildings, backlands, derelict and obsolete lands including residential development above retail and commercial premises in the town centre.

New Residential

To provide for new residential development in tandem with the provision of the necessary social and physical infrastructure.

The principles of sustainable development shall be taken into account when considering applications for residential development in the area, including the use of appropriate housing densities, natural, locally sourced materials, energy efficiency and transport implications, the impact on the existing ecology and compatibility with local environmental conditions.

Residential

To provide for residential development and protect and improve residential amenity.

This zoning is intended primarily for established housing development but may include a range of other uses particularly those that have the potential to improve the

residential amenity of residential communities such as schools, crèches, small shops, doctor's surgeries, small scale residential, playing fields, etc.

Potential sites may range from small gap infill, unused or derelict land and backland areas, side gardens of existing houses, up to larger undeveloped sites within an established residential area. A balance must be struck between the reasonable protection of the amenities and privacy of adjoining dwellings, the protection of established character and the need to provide infill development. Proposals for development involving the intensification of residential uses within existing residential areas will need to clearly demonstrate that the proposal respects the existing character of the area and would not harm the amenity value of adjacent properties.

Within this zoning category the improved quality of existing residential areas will be the Council's priority.

Strategic Residential Reserve

To provide for the longer-term housing requirements of the town.

Residential development, other than that set out below, will not be permitted on these lands during the lifetime of the Plan (It should be noted that lands zoned for the purposes of strategic residential reserve may be released for development over future plan periods). The following residential type of development may be considered acceptable:

- 1) Where there is a live permission for residential development that has not been activated.
The life of these permissions may be extended in accordance with the provisions of Section 42A of the Planning & Development Act 2000, (as amended). Proposals for new developments will not be considered over the lifetime of the current plan period.
- 2) A proposal for a single dwelling house may be considered under this zoning where:
 - a) the unit to be provided will serve as the permanent place of residence of the landowner or a member of his/her immediate family.
 - b) and where it can be clearly demonstrated that the provision of such a unit would not compromise the ability of the wider area of zoned land to be developed in the future.
 - c) and the dwelling would easily integrate with the existing and future development of the lands and those in the vicinity.
- 3) In exceptional circumstances where it can be clearly demonstrated by the developer that there is a significant difficulty in the release or identification of lands for a specific residential type development, consideration will be given to the release of lands zoned Strategic Residential Reserve, subject to established planning criteria and including in particular:
 - a) The requirement to remain within the overall residential land use targets as set out in the Core Strategy.
 - b) The lands are being developed in a sequential manner.
 - c) It has been clearly justified and demonstrated, to the satisfaction of the Planning Authority, that there is a clear discrepancy between the

supply and release of residentially zoned lands and the demand for residential units.

Certain developments that can demonstrate a strategic element, (e.g. a significant commercial or social element), may be deemed acceptable.

Recreation/Amenity and Green Spaces

To primarily provide for recreational open space, environmental buffers and ancillary structures.

To preserve, provide for and improve active and passive recreational public and private open space, environmental buffers and ancillary structures. The areas included in this zoning objective cover both private and public open space and are dispersed throughout urban centres of every size. The Council will not normally permit development that would result in a loss of open space. This zoning provides for open spaces, parks and development incidental to the enjoyment of open space including sport and leisure facilities such as a clubhouse, changing rooms, meeting rooms, a gym, sports training halls, catering facilities, caretaker accommodation.

The zoning also provides for the reservation of an environmental buffer in order to provide a visual barrier between different land uses and ensure the protection of the town's natural assets, maintaining an important wildlife corridor and enhancing the aesthetics of the area.

The zoning further facilitates the protection of existing green areas and public open spaces which provide for the passive and active recreational needs and provides for the use of such land or such facilities for games, educational and recreational purposes.

Social/Community/Education/Public Utility

To primarily provide for educational, health, social, cultural, religious and community facilities.

Clondra

Clondra, located on the County boundary with Roscommon is located close to the River Shannon, from where there is a link to the Royal Canal which, along with the River Camlin, bisects the settlement. Resulting from its strategic location at the confluence point of the River Shannon, Camlin, Royal and Cloondara Canal, Clondra is an important historic village. The core of the present village dates from the time of the construction of the Royal Canal. Consequently, the village developed around the watercourses and many traditional village functions, such as the Corn Mill, were a direct result of this. Accordingly, the settlement retains an interesting group of Canal related buildings in Ireland.

Town Core

To provide for the development and enhancement of town core uses including retail, residential, commercial, civic and other uses.

The purpose of this zoning is to protect and enhance the special character of the town centre and to provide for and improve retailing, residential, commercial, cultural and other uses appropriate to the centre of Clondra. This zoning provides for the consolidated development and growth of the town centre, allowing for a broad range of compatible and complementary uses which will be encouraged to locate in this area. Development will be expected to contribute to a dynamic, vibrant and pedestrian focused town core with a strong urban design approach. The Council will encourage the appropriate re-use, adaptation and regeneration of buildings, backlands, derelict and obsolete lands including residential development above retail and commercial premises in the town centre.

Development carried out under this zoning should have regard to the mix of uses of the zoning, and, in particular, shall have regard to the retail policy for the County. Developers should be cognisant of the high-profile locations of this zoning and design, wherein siting and materials should be chosen accordingly to ensure that any additional developments enhance the existing attractive streetscape.

The Bull House has been included in this zoning so that it can be retained and, if possible, could be repaired and used for commercial activities, subject to sensitive design and restoration.

Any development should consider the visual impact on the harbour area and be designed to the highest architectural standard.

New Residential

To provide for new residential development in tandem with the provision of the necessary social and physical infrastructure.

The principles of sustainable development shall be taken into account when considering applications for residential development in the area, including the use of appropriate housing densities, natural, locally sourced materials, energy efficiency and

transport implications, the impact on the existing ecology and compatibility with local environmental conditions.

Residential

To provide for residential development and protect and improve residential amenity.

This zoning is intended primarily for established housing development but may include a range of other uses particularly those that have the potential to improve the residential amenity of residential communities such as schools, crèches, small shops, doctor's surgeries, small scale residential, playing fields, etc.

Potential sites may range from small gap infill, unused or derelict land and backland areas, side gardens of existing houses, up to larger undeveloped sites within an established residential area. A balance must be struck between the reasonable protection of the amenities and privacy of adjoining dwellings, the protection of established character and the need to provide infill development. Proposals for development involving the intensification of residential uses within existing residential areas will need to clearly demonstrate that the proposal respects the existing character of the area and would not harm the amenity value of adjacent properties.

Within this zoning category the improved quality of existing residential areas will be the Council's priority.

Recreation/Amenity and Green Spaces

To primarily provide for recreational open space, environmental buffers and ancillary structures.

To preserve, provide for and improve active and passive recreational public and private open space, environmental buffers and ancillary structures. The areas included in this zoning objective cover both private and public open space and are dispersed throughout urban centres of every size. The Council will not normally permit development that would result in a loss of open space.

This zoning provides for open spaces, parks and development incidental to the enjoyment of open space including sport and leisure facilities such as a clubhouse, changing rooms, meeting rooms, a gym, sports training halls, catering facilities, caretaker accommodation.

This zoning provides for open spaces, parks and development incidental to the enjoyment of open space including sport and leisure facilities such as a clubhouse, changing rooms, a gym, sports training halls, catering facilities, caretaker accommodation.

The zoning also provides for the reservation of environmental buffers at strategic corridors and further facilitates the protection of existing green areas and public open spaces which provide for the passive and active recreational needs and provides for

the use of such land or such facilities for games, educational and recreational purposes.

Social/Community/Education/Public Utility

To primarily provide for educational, health, social, cultural, religious and community facilities.

This zoning encompasses community uses (such as schools, churches, OPDs etc.), public utility and social/administrative designations such as the Fire and Garda Stations. Expansion of these services will be facilitated where needed and compatible with adjoining land uses.

Canal Re-development Area

To facilitate environmental improvement works, including the provision of enhanced pedestrian facilities, street furniture and play areas etc.

The zoning caters for the use of the Canal as an amenity area and facilitates improvements in the level of services available for Canal users increasing the tourism potential of the area. The zoning is intended to facilitate environmental improvement works, including the provision of enhanced pedestrian facilities, street furniture and play areas etc.

In addition to this, the zoning will facilitate the provision of a service building/interpretative centre, with a multi-function purpose including (but not limited to) a water controller's office, a stores depot, a service block (toilets, showers, laundry, pump out), a marketing suite (small scale shop, tourist office), the provision of small-scale commercial facilities (such as a coffee shop) and other uses that benefit the community.

Constrained Land Use

To facilitate the appropriate management and sustainable use of flood risk areas.

This objective limits new development, while recognising that existing development uses within these zones may require small scale development, as outlined below, over the life of the Plan, which would contribute towards the compact and sustainable urban development of the County's zoned settlements.

The underlying zoning or the existing permitted uses are deemed to be acceptable in principle for minor developments to existing buildings (such as small extensions to houses, most changes of use of existing buildings), which are unlikely to raise significant flooding issues, provided they do not obstruct important flow paths, introduce a significant additional number of people into flood risk areas or entail the storage of hazardous substances.

Development proposals within this zone shall be accompanied by a detailed Flood Risk Assessment, carried out in accordance with *The Planning System and Flood Risk*

Assessment Guidelines and *Circular PL 2/2014* (or as updated), which shall assess the risks of flooding associated with the proposed development.

Proposals shall only be considered where it is demonstrated to the satisfaction of the Planning Authority that they would not have adverse impacts or impede access to a watercourse, floodplain or flood protection and management facilities, or increase the risk of flooding to other locations. The nature and design of structural and non-structural flood risk management measures required for development in such areas will also be required to be demonstrated, to ensure that flood hazard and risk will not be increased. Measures proposed shall follow best practice in the management of health and safety for users and residents of the development.

Specifications for developments in flood vulnerable areas set out in this Plan shall be complied with as appropriate (Please also refer to CPO 5.120 and DMS16.206).

Appendix 1F: Rural Settlement Clusters

Abbeylara, Ballycloughan, Ballywillan, Barry, Bunlahy, Carrickboy, Carriglass, Colehill, Coolarty, Cullyfad, Derraghan, Dring, Enybegs, Forgney, Killashee, Kilnatraun, Legga, Lisryan, Melview, Moydow, Moyne, Mullinalaghta, Newtowncashel, Ratharney, Stonepark, Taghshinny

Rural Settlement Clusters - Abbeylara, Ballycloughan, Ballywillan, Barry, Bunlahy, Carrickboy, Carriglass, Colehill, Coolarty, Cullyfad, Derraghan, Dring, Enybegs, Forgney, Killashee, Kilnatraun, Legga, Lisryan, Melview, Moydow, Moyne, Mullinalaghta, Newtowncashel, Ratharney, Stonepark, Taghshinny.

Rural Settlement Clusters have a limited level of services. In County Longford it relates to the above 26 no. settlements.

These locations have existing congregation areas and services such as schools, shops, post offices, public houses and residential houses available. Given the existing distinct character of these settlements which have experienced a certain level of recent development, it is envisaged that these areas will also provide limited local level services such as post offices, neighbourhood shops, national schools etc. There shall be a strong emphasis on the creation and maintenance of a sense of identity and local character in the proposed development of these areas.

The areas contained within each identified village envelope are zoned for *'small scale residential reflective of the existing character of the settlement and limited local level services such as post offices, neighbourhood shops, schools etc.'*, except where specifically stated otherwise. Residential development in these areas will be only permitted at a small scale, reflective of the character of the existing settlements.

Small-scale residential development which will alleviate the pressures for one-off housing in the open countryside will be permitted in these areas. These areas will cater for local need, in a similar manner to current one-off housing policy (and in accordance with the provisions of the Sustainable Rural Housing Guidelines).
