Longford URBACT Local Group Meeting – November Update

An online meeting of the Longford URBACT Local Group was held on 2nd November 2021. The Regeneration Officer summarised the outputs of the recent Transnational meeting, TM6, hosted by Michalovce. This meeting highlighted potential transferable knowledge in the areas of digital evaluation and the gathering of public perception in novel ways that have the potential to be aligned with existing Longford initiatives such as “Longford Nua” and can be explored further through the Longford ULG.

The meeting then focussed on specific actions to address the security issues affecting Longford centre identified in the previous meeting in October. A lively interactive session followed with the independent facilitator. This identified a wide range of potential actions across all ULG areas of responsibility. These actions will be developed further in the upcoming meeting of November 15th for incorporation in the Draft Integrated Action Plan (IAP) to be completed by the end of the year. The next transnational meeting is scheduled online for January 2022. This will focus on safe mobility and will be hosted by Pella.
